**Counteracting Containment Policies in the EU** Jenny Poon, 2025-10-22 This monograph examines an individual's right not to be returned to places where they may be in danger of serious human rights violations termed non refoulement. It argues that EU asylum practices can lead to a failure to observe this important right. As dire consequences can result if individuals are returned to places where they may face death, torture or other cruel treatment, the European asylum system must comply with non refoulement. However, EU countries use various tactics including legal measures to contain asylum claimants and refugees to other countries and to evade their responsibilities to observe non refoulement under international and European law. These containment strategies are demonstrated in two case study examples: the United Kingdom and Germany. In the first example, the United Kingdom returns asylum claimants and refugees back to transit countries where they did not claim asylum. This method of containing asylum claimants and refugees effectively increases the chances of them being indirectly returned to face violations of human rights. In the second example, Germany returns these claimants and refugees through transfer processes back to another EU country by relying solely on guarantees from national governments. This effectively contains the claimants and refugees outside of Germany, again increasing the risks of human rights violations. As violence and conflicts persist, this book contributes to existing literature by providing human rights law analysis with a unique lens of containment.

***Quaternary Geomorphology in India*** Balai Chandra Das, Sandipan Ghosh, Aznarul Islam, 2018-05-19 This edited book presents a novel collection of field-based empirical studies on the Quaternary geomorphology of the Lower Ganga Basin. The book covers a wide range of topics discussing various geomorphological facets of the Lower Ganga and its subsidiary rivers, focussing on laterites, palaeoenvironment and palaeogeomorphology, palaeo coastal landforms, neotectonism, tidal fluvial dynamics, extra channel geomorphology and channel pattern adjustment among others. Various methodologies were applied, ranging from historical records and religious texts to state-of-the-art remote sensing and GIS techniques. The book appeals to all scientists and postgraduate students of geomorphology and related areas who want to acquire detailed knowledge of the geology and geomorphology of the Lower Ganga Basin or are in search of new methodologies for studying the feedback mechanisms between forms and processes.

**Governance of the Global and Extra-Terrestrial Commons** Michael Roe, 2023-06-26 This book provides a unique analysis of the complex relationship between governance and the global commons. It has a specific reference to the dynamic and growing outer space economy and society and how experience in the maritime sector, which exhibits many of the same issues and challenges as outer space, can be useful in suggesting moves forward in policy making and design. This book fills a large gap in the literature of both governance and the development of outer space. Whilst the maritime sector has a long history of debate, albeit little in terms of governance and policy making, outer space has much less and what there has been commonly focused upon technical considerations. The importance of this book is that the failures of maritime governance need to be avoided in the outer space.

sector which exhibits many of the same issues particularly those related to the global commons Innovative and exciting this book will be of interest to academics studying corporate governance business management and space capitalism
