CONSIDER, CONSTRUCT, CONFIRM TIMOTHY. GOODWIN, 2021 **Making Learning-Centered Teaching Work** Phyllis Blumberg, 2023-07-03 This is a substantially expanded and enhanced revision of Phyllis Blumberg's acclaimed and bestselling book *Developing Learner Centered Teaching: A Practical Guide for Faculty* Jossey Bass 2009. This easy-to-follow how-to guide provides faculty with both a thorough introduction to this evidence-based approach to teaching and practical guidance on how to progressively implement it to strengthen the impact of their teaching. It demonstrates how they can integrate learning-centered teaching into their classroom practice without sacrificing content and rigor and how to positively engage students in the process by demonstrating its impact on their mastery and recall of key concepts and knowledge. An added outcome given that learning-centered teaching is correlated with improved student learning is the resulting assessment data that it provides faculty with the measures to meet the increased demands by accreditors, legislators, and society for evidence of improved teaching and learning outcomes. Phyllis Blumberg demonstrates how to use rubrics to not only satisfy outside requirements and accreditation self-studies but more importantly for faculty to use for the purposes of self-improvement or their teaching portfolios. She provides examples of how the rubrics can be used to ascertain whether college-wide strategic plans for teaching excellence are being met for program review and to determine the effectiveness of faculty development efforts. The book includes the following features: Boxes with easy-to-implement and adaptable examples covering applications across disciplines and course types; Worksheets that foster easy implementation of concepts; Rubrics for self-assessment and peer assessment of learning-centered teaching; Detailed directions on how to use the rubrics as a teaching assessment tool for individuals, courses, and programs; List of examples of use classified by discipline and type of course. Phyllis Blumberg offers *Making Learning-Centered Teaching* Course Design Institutes and workshops on this and other teaching and assessment topics. Half-day to multiple-day modules. Handbook of Technological Pedagogical Content Knowledge (TPACK) for Educators Michael Phillips, Evrim Baran, Punya Mishra, Matthew J. Koehler, 2025-11-24 The third edition of the *Handbook of Technological Pedagogical Content Knowledge (TPACK) for Educators* addresses the concept and implementation of technological pedagogical content knowledge. One of the most highly cited and widely recognized frameworks in educational technology, the TPACK construct provides teachers with the knowledge and skills they need to meaningfully integrate technology into teaching in specific content areas. This thorough substantive revision explores the emerging theoretical developments, empirical efforts, digital technologies, and diverse contextual factors that impact TPACK's evolution and enactment around the world. Critical perspectives on TPACK research on its deployment across specific content areas and integration into teacher education and professional development frame a variety of new and updated chapters covering research methods, contextual knowledge, artificial

Mowen,2013-03-14 Integrating control theory evolutionary psychology and a hierarchical approach to personality this book presents a new approach to motivation personality and consumer behavior Called the 3M which stands for Meta theoretic Model of Motivation this theory seeks to account for how personality traits interact with the situation to influence consumer attitudes and actions The book proposes that multiple personality traits combine to form a motivational network that acts to influence behavior Mowen argues that in order to understand the causes of enduring behavioral tendencies one must identify the more abstract traits underlying surface behaviors In constructing the 3M model the author reports data from fifteen empirical studies employing over 3500 respondents In this hierarchical model four types of personality traits are identified elemental compound situational and surface traits Eight elemental traits are proposed as forming the underlying dimensions of personality Consistent with control theory the research reveals that the elemental traits combine to form compound traits such as self efficacy task orientation playfulness and competitiveness These elemental and compound traits combine with situational influences to cause enduring behavioral tendencies within general situational contexts Examples of situational traits investigated include impulsive buying value consciousness sports interest and health motivation In the 3M model the elemental compound and situational traits combine to yield surface traits which are enduring dispositions to act in specific behavioral contexts Five surface traits are empirically investigated in the book compulsive buying sports participation healthy diet lifestyles proneness to bargaining and a tendency to frugality Across these five studies the empirical results reveal that the 3M model accounts for over 44% of the variance in the surface trait measures By presenting a new meta theory of motivation and personality that is testable Mowen s 3M model accounts for high levels of variance in consumer behavior By integrating the work of selected past and current theorists into a comprehensible whole the 3M model provides coherence in a field currently dominated by conflicting ideas theories and approaches The book provides evidence that by understanding the individual dispositions that underlie consumer behavior public policy officials and marketing specialists can develop better communication programs to influence and persuade their target audiences The book shows how to employ the 3M model to segment the marketplace provide psychographic inventories position brands create promotional themes and develop brand personalities **Handbook of Educational Psychology** David C.
