## **Leed 2015 Reference Guide Development Request For:**

The Sustainable Urban Design Handbook Nico Larco, Kaarin Knudson, 2024-04-30 The Sustainable Urban Design Handbook gathers the best sustainability practices and latest research from the fields of architecture landscape architecture planning development ecology and environmental engineering and presents them in a graphically rich and accessible format that can help guide urban design decisions in cities of all sizes The book presents a comprehensive framework that organizes more than 50 elements of sustainable urban design under five main topics Energy Use Greenhouse Gas Water Ecology Habitat Energy Use Production and Equity Health and relative to four project scales Region City District Neighborhood Block Street and Project Parcel Each element chapter includes a summary of importance and background compares typical practices and recommended approaches explains connections to other elements and concludes with urban design guidelines that can be used to directly inform projects and decisions Easy to use and reference The Sustainable Urban Design Handbook provides both an in depth introduction to topics across sustainable urban design and serves as an on going reference for anyone involved in the creation of sustainable urban environments This resource will be useful to design and planning professionals community members students and elected officials in guiding decisions about our sustainable future

District Cooling Systems Khin Zaw, Aung Myat, Md Raisul Islam, Poh Tiong Keng, Aung Kywe Nyunt, 2025-05-09 This book draws on the authors industry and academic expertise to explain the theory and practice of district cooling systems DCS The in depth exploration of the design and development of DCS presents detailed best practices for their optimization in both the development and operation phases Readers will gain in depth practical knowledge on all areas and considerations related to DCS technology s best practices including current practical research areas and future potential research areas This book addresses five areas related to DCS the fundamentals of DCS technology design optimization for development purposes real time optimization for daily operations techno commercial decision making framework and industry best practice This information is presented through analyses of technological progress to date case studies of current operations and in depth discussions of the theoretical bases and commercial technical and environmental benefits Through this book readers can recognize and apply best practices for the design development and operation of an optimal DCS design based on multiple factors including financial analysis energy efficiency considerations and practical operation issues This will enable them to contribute to national and international sustainable development goals regarding sustainable cities and climate action As this book provides both industry know how and future research directions related to DCS it is invaluable for DCS industry professionals and advanced undergraduate and postgraduate engineering students who aim to enter this industry and develop leading highly efficient DCS systems Overall it is a vital resource for anyone involved in the planning execution and management of DCS projects

**Sustainability Assessments of Buildings** Umberto Berardi, 2018-07-06 This book is a printed edition of the Special Issue Sustainability Assessments of Buildings that was published in Sustainability *Quality of*

*Life in Urban Landscapes* Roberta Cocci Grifoni, Rosalba D'Onofrio, Massimo Sargolini, 2017-12-14 This volume introduces an innovative tool for the development of sustainable cities and the promotion of the quality of life of city inhabitants. It presents a decision support system to orient public administrations in identifying development scenarios for sustainable urban and territorial transformations. The authors have split the volume into five parts which respectively describe the theoretical basis of the book, the policies in question and indicators that influence them, the decision support system that connects indicators to policies, the case study of Ancona Italy and potential future directions for this work. This volume is based on transdisciplinary research completed in May 2016 that involved about 40 researchers at The University of Camerino Italy and other European universities. With purchase of this book, readers will also have access to Electronic Supplementary Material that contains a database with groups of indicators of assessment of urban quality of life and a toolkit containing the data processing system and management information system used in the book's case study.

*Green Planning for Cities and Communities* Giuliano Dall'O', 2020-03-21 This book addresses key issues across the field of sustainable urban planning and provides a unique reference tool for planners, engineers, architects, public administrators and other experts. The evolution of cities and communities is giving rise to pressing energy and environmental problems that demand concrete solutions. In this context, urban planning is inevitably a complex activity that requires a sound analytical interpretation of ongoing developments, multidisciplinary analysis of the available tools and technologies, appropriate political management and the ability to monitor progress objectively in order to verify the effectiveness of the policies implemented. This book is exceptional in both the breadth of its coverage and its focus on the interactions between different elements. Individual sections focus on strategies and tools for green planning, energy efficiency and sustainability in city planning, sustainable mobility, rating systems and the smart city approach to improving urban scale sustainability. The authors draw on their extensive practical experience to provide operational content supplementing the theoretical and methodological elements covered in the text, and each section features informative case studies.

***Energy Efficient Cities of Today and Tomorrow*** Jukka Heinonen, Sanna Ala-Mantila, Ortzi Akizu-Gardoki, 2021-04-01 Ongoing urbanization and ever growing harmful environmental impacts from urban areas necessitate a sustainability transformation in cities. However, cities are also centers of wealth creation and consumption which both drive environmental degradation. It is clear that cities need to re-establish themselves as low energy, low carbon systems, but the transformation is complex in many ways and time is running out. This Special Issue *Energy Efficient Cities of Today and Tomorrow* seeks to provide a more profound understanding of the future energy requirements of urban areas and low energy and low carbon cities. The published papers range from macro level assessments of cities manifesting themselves as forerunners in their environmental work to micro level studies of pro environmental attitudes and their impacts on individual emissions, a carbon footprint, impacts of sharing of goods and services.

*Design Innovations for Contemporary Interiors and Civic Art* Crespi, Luciano, 2016-09-08 In some post industrial areas, re-designing structural

interiors in an attractive way is becoming increasingly important to community members as it helps promote local pride and a higher quality of life Design Innovations for Contemporary Interiors and Civic Art examines novel techniques in structural designs in various cultural and social scenarios Featuring innovative application methods emergent trends and research on tools being utilized in the field this publication is a pivotal reference source for designers researchers practitioners and professionals interested in interior design urban culture and structural aesthetics

**Stratum Ventilation—Advanced Air Distribution for Low-Carbon and Healthy Buildings** Sheng Zhang,Yong Cheng,Zhang Lin,2024-11-01 This book investigates the creation of healthy and thermally comfortable built environments in a low carbon manner with advanced air distribution i e stratum ventilation Stratum ventilation efficiently supplies conditioned and clean air to the head level of occupants for thermal comfort and inhaled air quality and largely reduces energy consumption and CO2 emission e g by 44% and 32% respectively compared with the conventional air distribution method This book provides the working principles performance evaluations methods design methods operation methods and different application scenarios particularly highlighting airborne infection risk control of respiratory diseases and integrated application with renewable energy of stratum ventilation to provide theoretical understandings and technical guidelines of stratum ventilation The book is intended for undergraduate and graduate students researchers and engineers who are interested in cutting edge technologies of livable and sustainable built environments
