It discusses the management of various health conditions such as diabetic mellitus, epilepsy, mental health, hepatitis, and HIV/AIDS. It covers a broad range of topics including strategies that can be used in a healthcare setting in communication as well as transmission of knowledge from one generation to another. Research Anthology on Advancements in Women's Health and Reproductive Rights Management Association, Information Resources, 2022-05-06 Reproductive health and rights are critical topics in today's society as laws and policies are continuously debated and adjusted across the world. There are many different outlooks on these issues, and different countries have widely varying laws in place at present. In order to better understand where the world currently is regarding these pressing discussions, further study is needed on the status of women's reproductive rights. The Research Anthology on Advancements in Women's Health and Reproductive Rights provides a thorough review of the current research available regarding reproductive health. The book discusses how various countries and regions are handling reproductive rights as well as current issues women face within their reproductive health journeys. Covering topics such as sexual health, gender, and pregnancy, this major reference work is ideal for nurses, government officials, policymakers, healthcare professionals, researchers, scholars, academicians, practitioners, instructors, and students.

Extended Curriculum Programmes Tennyson Mgtshini, 2022-04-30 The introduction of ECPs in South African Universities is seen by many as South Africa's key strategy for addressing the problem of poor patterns of student success and has its basis on the uncontested acceptance that an extended study duration may be necessary to bring some categories of learners to a level of parity with the readiness expectations of their course of study. Even so, this transformative strategic imperative has been plagued by a range of challenges that include poor systems, readiness, poor selection mechanisms in the identification of ECP students, poor numeracy and literacy amongst students, and indifferent teacher involvement in ECPs. This volume offers a rare insight into many of the above recognised challenges and, in so doing, provides critical matter for thought for educators within the higher education sector.
