Mine the Gap for Mathematical Understanding, Grades K-2 John SanGiovanni, 2016-10-31 Being an effective math educator is one part based on the quality of the tasks we give one part how we diagnose what we see and one part what we do with what we find Yet with so many students and big concepts to cover it can be hard to slow down enough to look for those moments when students responses tell us what we need to know about next best steps In this remarkable book John SanGiovanni helps us value our young learners misconceptions and incomplete understandings as much as their correct ones because it s the gap in their understanding today that holds the secrets to planning tomorrow s best teaching SanGiovanni lays out 160 high quality tasks aligned to the standards and big ideas of grades K 2 mathematics including counting and representing numbers number relationships and comparison addition and subtraction within 100 and 1000 money and time and multiplication and division The tasks are all downloadable so you can use or modify them for instruction and assessment Each big idea offers a starting task followed by what makes it a high quality task what you might anticipate before students work with the task 4 student examples of the completed task showcasing a distinct gap commentary on what precisely counts for mathematical understanding and the next instructional steps commentary on the misconception or incomplete understanding so you learn why the student veered off course three additional tasks aligned to the mathematics topic and ideas about what students might do with these additional tasks It s time to break our habit of rushing into re teaching for correctness and instead get curious about the space between right and

wrong answers Mine the Gap for Mathematical Understanding is a book you will return to again and again to get better at selecting tasks that will uncover students reasoning better at discerning the quality and clarity of students understanding and better at planning teaching based on the gaps you see Investigations in Number, Data, and Space ,2008 Part of a K 5 mathematics curriculum with curriculum units for classroom use and resources for teachers the Investigations curriculum was developed at TERC formerly Technical Education Research Centers Primary Algebra Hope Martin,2008-10-31 Grok patterns of smiley faces Crank answers out of a function machine Solve Sudoku puzzles and math jokes riddles students answer by solving problems Balance a scale so the dominoes on one side match the dominoes on the other side Correlated to NCTM and Common Core standards hands on activities and concrete manipulatives help students learn how to generalize math problems by using variables seeing patterns and functions in concrete ways and grasping the concept of equivalence accomplished by the metaphor of balancing scales The teacher book offers teaching procedures and reproducible worksheets the student book conveniently binds one student s worksheets together Grades K 5 Illustrated Good Year Books 139 pages 2011 revised edition **New York Teachers' Monographs** ,1910 Southern Law Review and Chart of the Southern Law and Collection Union ,1874 **Standard Service Arithmetic: Grades one and two** John Ward Studebaker,William C.
