lens the scalar approach and global and multi sited ethnography The contributions go beyond the early criticisms of
methodological nationalism providing insights into new strategies and illustrating how scholars apply these research
strategies in different fields such as migration research and social anthropology Analyzing the advantages and lacunae of

military histories of the World Wars ended and social historical histories of conflict rose to prominence women have come to
play an increasingly important role in mainstream stories about the Second World War Although this is undeniably a valuable
development the perspectives on women that arose have in many respects remained limiting although in new ways Women
have been portrayed as carers as victims notably of sexual violence but rarely as agents of their own fate This volume focuses
on this last group In spite of the undeniable suffering and victimization that befell so many women during the war for others
the war also opened opportunities and awakened ambitions The articles in this volume which cover both Europe and Asia
