SECTION B		
Section B consists of 5 questions of 2 marks each.		
21.	<p>Let us assume, to the contrary, that $\sqrt{2}$ is rational. So, we can find integers a and b such that $\sqrt{2} = \frac{a}{b}$ where a and b are coprime. So, $b\sqrt{2} = a$. Squaring both sides, we get $2b^2 = a^2$. Therefore, 2 divides a^2 and so 2 divides a. So, we can write $a = 2c$ for some integer c. Substituting for a, we get $2b^2 = 4c^2$, that is, $b^2 = 2c^2$. This means that 2 divides b^2, and so 2 divides b. Therefore, a and b have at least 2 as a common factor. But this contradicts the fact that a and b have no common factors other than 1. This contradiction has arisen because of our incorrect assumption that $\sqrt{2}$ is rational. So, we conclude that $\sqrt{2}$ is irrational.</p>	<p>$\frac{1}{2}$</p> <p>$\frac{1}{2}$</p> <p>$\frac{1}{2}$</p> <p>$\frac{1}{2}$</p>

Understanding Mathematics □ 6 C. Sailaja, Smita Ratish, Lata Wishram, *Understanding Mathematics* is a carefully written series of mathematics to help students encourage the study of mathematics in the best interactive form. It contains ample practice material, attractive illustrations, and real life examples for the students to relate the topics with their everyday life. Special care has been taken while teaching topics like geometry and probability to the students. Keeping in mind the development status and comprehension level of students, the text has been presented in a well-graded manner. *Teacher Education through Active Engagement* Lori Beckett, 2013-12-04 *Teacher Education through Active Engagement* identifies and addresses a contemporary issue: the ways in which teaching and teacher education are articulated by politicians, civil servants, business leaders, and educational entrepreneurs intent on profit making in the current global neoliberal policy context. This is often characterised by narrow and ill-conceived ideas about teacher characteristics and competences, recruiting and fast-tracking graduates from elsewhere into the profession, the reform of teacher training with less emphasis on theory and academic study, a narrow focus on teachers' core skills, and the promotion of training in model teaching schools. In this book, contributors challenge this conceptualisation and demonstrate practitioners' necessary intellectual activity to wrest back professional control. By drawing on practice-focused research carried out in sites of educational policy and practice, each chapter exemplifies for teachers, student teachers, and teacher educators the sort of knowledge work to coordinate a professional reply to non-educationalists who dictate the terms of teaching and teacher education. The book provides directions for encouraging critical thinking, analytical skills, and political activism which consider the needs and interests of diverse children and young people in real classrooms, real schools, and real communities. Illustrated throughout with practice-focused research and drawing on the historical case of Winifred Mercier and her colleagues at the City of Leeds training college who challenged the establishment to leave a legacy of professional control, the book will appeal to practitioners, academics, and researchers in the fields of teacher education and education studies. **Higher Education in Austerity Europe** Jon Nixon, 2017-09-21 The financial crisis of 2007-2008 prompted governments across Europe to adopt austerity measures aimed at the reduction of their escalating budget deficits. *Higher Education in Austerity Europe* explores how the resulting cuts in public expenditure, together with the increasing reliance on the privatisation of services, have impacted on higher education directly through the reduction of public sector provision and indirectly as a result of the social and political consequences of that reduction. Moreover, it explores how the effects of these economic policies have differed markedly across the national regions of Europe, with the result that inequality has increased significantly both within and between national regions, and this in turn has led to social and political dislocation within and across communities. It is only by viewing higher education within this broader context that we can begin to understand the full implications of the austerity measures introduced over the last ten years. Jon Nixon draws together leading scholars to delve into the complexity of impact and

response generated by these measures Part 1 focuses on cross European perspectives Part 2 on the impact of austerity measures within national systems and Part 3 on new perspectives and possibilities The volume also includes considered responses from outsiders by academics located in Asia Australia and the USA providing an additional dimension to the analysis As well as analysing the full impact of austerity measures across some of the worst hit national regions of Europe the contributors also identifying openings and possibilities for renewal
