

# INSTRUMENTS AND CONTROLS

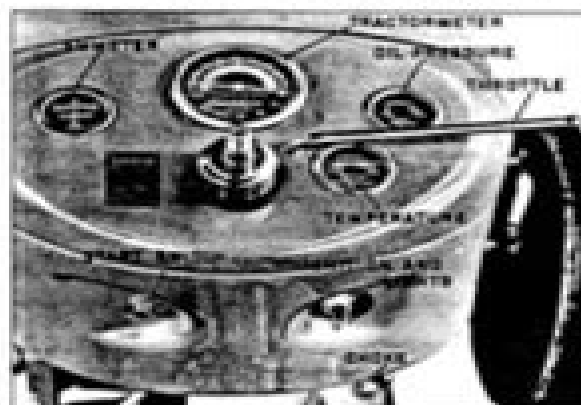

FIG. 1 - INSTRUMENTS AND CONTROLS LOCATED ON DASH PANEL.

## IGNITION SWITCH

The key operated ignition and light switch is located in the recessed portion of the lower right side of the instrument panel. It has four positions:

- O - Off Position.
- I - Ignition position - this closes the ignition circuit.
- IL - Ignition and light position. This closes the ignition and light circuit.
- L - Light position. This closes the light circuit only.

The key can be removed from the switch only when in the "off" position. When the key is removed, the switch is locked.

## STARTER PUSH BUTTON SWITCH

Located on the lower left portion of the instrument panel conveniently recessed out of the way. The switch closes the starting motor circuit only when the Hi-Lo shift lever is in neutral position and the ignition switch is "on".

## CHOKE

Pull-type button located on the lower right of the instrument panel. Pulling the choke out from the panel provides a rich fuel mixture for faster and easier starting.

## THROTTLE LEVER

Located between the steering wheel and instrument panel at the upper right of the steering column. Pulling the throttle downward increases the engine speed.

## AMMETER

Induction type located on left side of instrument panel. The ammeter indicates the rate of battery charge or discharge and not the generator output.

## OIL PRESSURE GAUGE

Located on upper right of instrument panel. The gauge indicates the amount of pressure and not the amount of oil in the system.

## WATER TEMPERATURE GAUGE

Located on the lower right side of the instrument panel. The gauge indicates the engine temperature. When the engine has properly warmed-up, the needle should always remain in the "green" or normal operation position.

## TACHOMETER

Located in the center of the instrument panel. The instrument is a combination tachometer, speedometer and modified hour meter. The six scales on top of the dial indicate forward miles per hour corresponding to the gear engaged, the bottom scale indicates engine RPM, and the window at the center of the dial indicates the total accumulated equivalent hours of operation at an average speed of 1500 RPM. It should be noted, however, that engine speeds lower than 1500 RPM will accumulate hours slower than clock hours while engine speeds higher than 1500 RPM will accumulate hours faster than clock hours. The normal pulley operating speed and PTO speeds are also shown on the dial face.

## GEAR SHIFT LEVER

Located in front of the tractor seat on the top center of the transmission housing. The three forward and one reverse gears are indicated by raised characters on the tractor center housing. The gear shift lever must be used in conjunction with the Hi-Lo shift lever.
