## Manual For Star Test:

*The Astrophotography Manual* Chris Woodhouse, 2017-12-04 The Astrophotography Manual Second Edition is for photographers ready to move beyond standard SLR cameras and editing software to create beautiful images of nebulae, galaxies, clusters, and the stars. Beginning with a brief astronomy primer, this book takes readers through the full astrophotography process from choosing and using equipment to image capture, calibration, and processing. This combination of technical background and hands-on approach brings the science down to earth with practical methods to ensure success. This second edition now includes over 170 pages of new content within 22 new chapters with 600 full-color illustrations. Covers a wide range of hardware including mobile devices, remote control, and new technologies. Further insights into leading software including automation Sequence Generator Pro and PixInsight. Ground-breaking practical chapters on hardware and software as well as alternative astrophotography pursuits.

 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using  
 Meade s Autostar Goto facility My motivation to write a book about the LXD Goto telescope series first came from comments  
 about an LXD55 AR 6 Refractor review that was published on the LXD55 com website From then on I have had regular  
 emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending  
 Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have  
 never owned or used an equatorially mounted Goto telescope before Since the first LXD55 models came out in early 2002  
 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been  
 mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the
