Psychology Chapter 6 Learning

Question 1. What is learning? What are its distinguishing features?

Answer: The process of learning has certain features:

1. Learning always involves some kinds of experience or practice.
 - Changes due to maturation or growth are not learning.
e.g.: One learns that if the bell rings in the hostel after sunset, then dinner is ready to be served.
2. Sometimes a single experience can lead to learning.
e.g.: A child strikes a match stick on the side of a matchbox and gets her/his finger burnt. Such an experience, makes the child learn to be careful in handling the matchbox in future.
 - Before it can be called learning, the change must be relatively permanent, it must last for a fairly long time.
3. Learning must be distinguished from the behavioural changes that are neither permanent nor learnt.
eg. changes in behaviour due to fatigue, habituation and drugs.
4. Learning is a change in behaviour, for better or worse.
5. Learning follows a sequence.

Question 2. How does classical conditioning demonstrate learning by association?

Answer:

- Classical conditioning is a type of learning in which an organism learns to associate stimulus.
- Conditioning is the simplest form of learning.
