animal activists rarely collaborate perhaps because environmentalists focus on species and ecosystems while animal
advocates look to the individual and neither seems to have much respect for the other This diverse collection of essays
highlights common ground between earth and animal advocates most notably the protection of wildlife and personal dietary
choice If earth and animal advocates move beyond philosophical differences and resultant divergent priorities turning
attention to shared goals both will be more effective and both animals and the environment will benefit Given the undeniable
seriousness of the environmental problems that we face including climate change and species extinction it is essential that
activists join forces Drawing on a wide range of issues and disciplines ranging from wildlife management hunting and the
work of NGOs to ethics ecofeminism religion and animal welfare this volume provides a stimulating collection of ideas and
