Levine, Jared Stark, 2022-01-01 The 141st volume of Yale French Studies examines the life and work of Claude Lanzmann following his masterpiece Shoah This volume of Yale French Studies charts the different paths the filmmaker Claude Lanzmann 1925 2018 took after the release of Shoah in 1985 These paths are explored through a consideration of his late films Tsahal 1994 A Visitor from the Living 1997 Sobibor October 14 1943 4 p m 2001 Light and Shadows 2008 The Karski Report 2010 The Last of the Unjust 2013 Napalm 2017 and Four Sisters 2018 and of his memoir The Patagonian Hare The volume also includes an English translation of his last major interview Self Portrait at Ninety The original essays collected here show that Lanzmann's late films and writing stand as something more than mere footnotes to his 1985 masterpiece Continuing to wrestle with questions of cinematic transmission and the relationship among film history and testimony they confront anew and in a variety of approaches the challenge of representing the Holocaust and of living in its aftermath *Emerging Pervasive Information and Communication Technologies (PICT)* Kenneth D. Pimple, 2013-08-26 This book provides a wide and deep perspective on the ethical issues raised by pervasive information and communication technology PICT small powerful and often inexpensive Internet connected computing devices and systems It describes complex and unfamiliar technologies and their implications including the transformative potential of augmented reality the power of location linked information and the uses of big data and explains potential threats including privacy invaded security violated and independence compromised often through widespread and lucrative manipulation PICT is changing how we live providing entertainment useful tools and life saving systems But the very smartphones that connect us to each other

and to unlimited knowledge also provide a stream of data to systems that can be used for targeted advertising or police surveillance Paradoxically PICT expands our personal horizons while weaving a web that may ensnare whole communities Chapters describe particular cases of PICT gone wrong but also highlight its general utility Every chapter includes ethical analysis and guidance both specific and general Topics are as focused as the Stuxnet worm and as broad as the innumerable ways new technologies are transforming medical care Written for a broad audience and suitable for classes in emerging technologies the book is an example of anticipatory ethics ethical analysis aimed at influencing the development of new technologies Deborah Johnson 2010 The growth of PICT is outpacing the development of regulations and laws to protect individuals organizations and nations from unintended harm and malicious havoc This book alerts users to some of the hazards of PICT encourages designers developers and merchants of PICT to take seriously their ethical responsibilities if only to do no harm before their products go public and introduces citizens and policy makers to challenges and opportunities that must not be ignored
