Literacy Instruction for All Children Thomas G. Gunning, 2000 Creating Literacy Instruction for All Children is a comprehensive practical text that provides its readers with step by step guidance for teaching all major aspects of reading

and writing Gunning's text helps students discover approaches and techniques that fit teachers' personal styles and situations. It aims to present as fairly completely and clearly as possible the major methods and strategies shown to be successful in research and practice. The text features sample lessons for virtually every major literacy skill strategy and offers numerous reinforcement suggestions and generous listings of materials. With two updated chapters on word analysis skills strategies, the text continues to give teachers the information and techniques they need to implement a systematic and functional program of word analysis that is integrated with students' reading and writing. The text also presents the theory behind the methods so students will be free to choose, adapt, and/or construct their own approaches as they create literacy instruction. This edition endorses the viewpoint that a well-prepared classroom teacher is capable of effectively instructing most struggling readers and writers.
