

# OASIS HYDRANT ASSIST AND HYDRANT MASTER VALVE STORAGE BRACKET

## INSTALLATION INSTRUCTIONS

Oasis Hydrant Assist Valve

Hydrant Master Valve

**Tools Required:** Electric Drill  
Drill Bits (see instructions for correct size)  
#3 Phillips Screw Driver  
Wrench 7/16" (1/4" bolts); 9/16" (3/8" bolts); adjustable

The Oasis Hydrant Assist and Hydrant Master Valve storage brackets must be securely mounted to a surface capable of supporting the weight of the Valve including any shock loads that may result from rough roads. **It is the responsibility of the installer to determine if the installation is capable of these loads.** The Valve may be mounted on the wall or floor of a compartment.

### **⚠ WARNING**

This bracket is designed for storage only. Do not use as a mount when flowing water.

This Storage Bracket comes with stainless steel self tapping screws, nuts and lock-washers. If the material beneath the storage bracket is thick and substantial enough, the self-tapping screws may be screwed directly into the mounting surface. If the backside of the mounting surface is accessible, clearance holes may be drilled, and the nuts and lock washers may be used on the backside. **It is the responsibility of the installer to determine if the mounting surface is satisfactory.**

### FOR BLIND MOUNTING

Lay out the steel metal bracket in the area where the valve will be mounted. The end of the bracket with the latch goes toward the valve outlet. Make sure there is enough clearance to get the valve in and out of the bracket and that it does not interfere with other equipment on the truck.

Make sure the material beneath the bracket is substantial and thick enough to hold self-tapping screws as well as the weight of the valve. Make sure the area on the other side of the mounting surface is clear, to avoid wires or other obstructions. Using the bracket for a pattern, drill one hole and screw the bracket to the mounting surface. See the chart on next page to determine the correct hole size. Put the lock washers on the screw before installing. While the first screw holds the bracket from moving, drill the remaining holes and screw in the remaining screws.
