developed over decades of serving as a Green Beret in the US Army Special Forces The foundation for Morris s methodology is KISS which stands for keep it simple stupid an acronym widely used by the military to remind soldiers that the best solutions are often the simplest In his eight pillar system it is up to the survivor to assess their situation and then choose the pillar that is needed most to survive the situation at hand Much like a rifle pop up target range where a shooter is expected to hit the closer more dangerous 50 meter target first before engaging the 300 meter target the survivor needs to choose the pillar that is most urgent and necessary to save their life under the circumstances **The Green Beret Survival Guide**
