Construct a Dichotomous Key of Imaginary Creatures

PART A.

Under the figures below, assign a Genus and species name for each creature. Always capitalize the first letter of the Genus, while the species name is written in lowercase. Both words are underlined or italicized. eg., "*Chondria volutus*."

PART B.

In the table provided, create a series of numbered steps with the first step showing the first characteristic you used so that someone could use it to identify any creature from this group of 12 creatures. At each step, offer two choices for classifying the creature based on a single characteristic. For example, you may use the characteristic "appendages are flippers". Your first numbered step in your key would be [1a] appendages are flippers; [1b] appendages are not flippers.
