Middle Office Manual:

Behind the Swap Andrew DeJoy, 2022-05-10 Andrew DeJoy's *Behind the Swap* offers a middle office perspective on the risks and miscommunications in post trade processing and provides a framework and solutions for a better approach. In August of 2020 Citibank made one of the worst mistakes in banking history it accidentally sent out almost 900 million of its own funds. Many of the recipients didn't give back the money. Citibank sued and a federal court ruled that the recipients could keep the funds. Citibank's error is not surprising. The underlying contributors that led to the mistaken payment permeate the global financial services industry. Manual data entry, decades old technological infrastructure, inadequate training, and systems that can't interact with one another are just a few of the problems that face post trade processing. The machinery behind financial markets. Unfortunately, years of neglect by regulators and financial institutions themselves has left this infrastructure needlessly complex, astoundingly inefficient, frequently inaccurate, and woefully inadequate for modern financial markets. The problems are easy to see but difficult to admit. For financial institutions, the current system costs billions of dollars each year in labor, systems maintenance, and lost funds. For regulators, the current system precludes the ability to track systemic risk. It also artificially inflates the stability of the global financial system. For lawyers and prosecutors, the current system allows ample opportunity for unlawful misconduct such as rogue trading and fraud. Andrew DeJoy's *Behind the Swap* examines the risks involved in post trade processing in swaps and derivative markets and provides solutions to better control those risks. While Andrew doesn't claim to have all the answers, he does believe there is a better system that is both achievable and necessary.

Digital Transformation in Cloud Computing Alibaba Cloud Intelligence GTS, 2022-06-13 With the rapid development of cloud computing and digital transformation, well designed cloud based architecture is always in urgent need. Illustrated by project cases from the Chinese technology company Alibaba, this book elaborates how to design a cloud based application system and build them on the cloud. Cloud computing is far from being just a resource provider; it offers database storage and container services that can help to leverage key advantages for business growth. Based on this notion, authors from the Alibaba Cloud Global Technology Services introduce new concepts and cutting edge technology in the field, including cloud native, high availability, and disaster tolerance design on cloud business, middle office data, middle office and enterprise digital transformation. Resting upon Alibaba's years of practice and achievements in the field of cloud technology, the volume also elucidates the methodology and practice solutions of digital construction, including methodology, product tools, technical processes, architecture design, cloud application capacity assessment and optimization etc. The book will appeal to researchers, students, and especially IT practitioners, professionals, and managers interested in cloud computing, digital transformation, cloud migration, business, middle office data, middle office as well as the Alibaba Cloud itself.

Capital, Labour and the Middle Classes John Urry, Nicholas Abercrombie, 2014-08-21 Most recent sociological work on the theory of class is

based on a distinction between Weberian and Marxist approaches For the first part of this volume the authors use this distinction to review the literature on the middle class concentrating particularly on the traditions of Marxist theory and of the more empirical work inspired by Max Weber They show however that this distinction is of limited utility in reconstructing a theory of the middle class
