Intellectual Property and Public Health in the Developing World Monirul Azam, 2016-05-30 Across the world developing countries are attempting to balance the international standards of intellectual property concerning pharmaceutical patents against the urgent need for accessible and affordable medicines In this timely and necessary book Monirul Azam examines the attempts of several developing countries to walk this fine line He evaluates the experiences of Brazil China India and South Africa for lessons to guide Bangladesh and developing nations everywhere Azam's legal expertise concern for public welfare and compelling grasp of principal case studies make Intellectual Property and Public Health in the Developing World a definitive work The developing world is striving to meet the requirements of the World Trade Organization's TRIPS Agreement on intellectual property This book sets out with lucidity and insight the background of the TRIPS Agreement and its implications for pharmaceutical patents the consequences for developing countries and the efforts of certain representative nations to comply with international stipulations while still maintaining local industry and public health Azam then brings the weight of this research to bear on the particular case of Bangladesh offering a number of specific policy recommendations for the Bangladeshi government and for governments the world over Intellectual Property and Public Health in the Developing World is a must read for public policy makers academics and students non governmental organizations and readers everywhere who are interested in making sure that developing nations meet the health care needs of their people

The Future of Drone Use Bart Custers, 2016-10-15 Given the popularity of drones and the fact that they are easy and cheap to buy it is generally expected that the ubiquity of drones will significantly increase within the next few years This raises questions as to what is technologically feasible now and in the future what is acceptable from an ethical point of view and what is allowed from a legal point of view Drone technology is to some extent already available and to some extent still in development The aim and scope of this book is to map the opportunities and threats associated with the use of drones and to discuss the ethical and legal issues of the use of drones This book provides an overview of current drone technologies and applications and of what to expect in the next few years The question of how to regulate the use of drones in the future is addressed by considering conditions and contents of future drone legislation and by analyzing issues surrounding privacy and safeguards that can be taken As such this book is valuable to scholars in several disciplines such as law ethics sociology politics and public administration as well as to practitioners and others who may be

confronted with the use of drones in their work such as professionals working in the military law enforcement disaster management and infrastructure management Individuals and businesses with a specific interest in drone use may also find in the nineteen contributions contained in this volume unexpected perspectives on this new field of research and innovation

Bart Custers is Associate Professor and Head of Research at eLaw the Center for Law and Digital Technologies at Leiden University The Netherlands He has presented his work at international conferences in the United States China Japan the Middle East and throughout Europe and has published over 80 scientific professional and popularizing publications including three books

Nimble Baba Prasad, 2015-04-24 The world today can be best described by one word turbulence As change rages all around how can you as an individual or as an organization take advantage of unexpected opportunities and succeed in difficult circumstances In a book that challenges traditional notions of strategy Baba Prasad draws on his research at some of the world's best business schools to show how intelligence can help you and your business navigate this maelstrom The Intelligences Framework presented in Nimble goes beyond the common management concept of agility it presents an immensely practical and hands on approach for companies and individuals to develop five kinds of intelligences and apply them in different settings for maximum benefit Bridging strategy leadership and innovation and with vivid illustrations Nimble provides a path breaking assessment methodology and a systematic four step approach that every company and individual can use to lead amid turbulence

The Next Great Observatory United States. Congress. House. Committee on Science, Space, and Technology (2011), 2011

How to Make Better Decisions. Examples from Exploration Bernhard Seubert, 2021-11-26 Scientific Essay from the year 2014 in the subject Psychology Industrial and organizational psychology grade A language English abstract Good decision making creates value for a company The decision to drill in the right place or not has strong economic repercussions Moreover the human approach to decision making can be flawed Many of the common flaws in decision making are related to heuristic factors that is by human ways of thinking and drawing conclusions These factors can negatively impact the outcomes of an exploration program This paper gives examples of cases in which geoscientific reasoning can lead to pitfalls and explores why this is so The paper then discusses the merits of the multiple working hypotheses MWH concept as an aid to harnessing seemingly contradictory data relating to several often mutually exclusive interpretations or scenarios A simple method using a spreadsheet and decision tree analysis is proposed to quantify the outcomes of multiple scenarios The method is illustrated by a subsurface example in which two possible interpretations reef versus volcano are considered An outlook of Bayesian statistics and other methods is included
