Arguing with Numbers James Wynn, G. Mitchell Reyes, 2021-04-15 As discrete fields of inquiry rhetoric and mathematics have long been considered antithetical to each other That is if mathematics explains or describes the phenomena it studies with certainty persuasion is not needed This volume calls into question the view that mathematics is free of rhetoric Through nine studies of the intersections between these two disciplines Arguing with Numbers shows that mathematics is in fact deeply rhetorical Using rhetoric as a lens to analyze mathematically based arguments in public policy political and economic theory and even literature the essays in this volume reveal how mathematics influences the values and beliefs with which we assess the world and make decisions and how our worldviews influence the kinds of mathematical instruments we construct and accept In addition contributors examine how concepts of rhetoric such as analogy and visuality have been employed in mathematical and scientific reasoning including in the theorems of mathematical physicists and the geometrical diagramming of natural scientists Challenging academic orthodoxy these scholars reject a math equals truth reduction in favor of a more constructivist theory of mathematics as dynamic evolving and powerfully persuasive By bringing these disparate lines of inquiry into conversation with one another Arguing

with Numbers provides inspiration to students established scholars and anyone inside or outside rhetorical studies who might be interested in exploring the intersections between the two disciplines In addition to the editors the contributors to this volume are Catherine Chaput Crystal Broch Colombini Nathan Crick Michael Dreher Jeanne Fahnestock Andrew C Jones Joseph Little and Edward Schiappa Farmers' Review ,1886 *Civics for the World to Come* Nicole Mirra, Antero Garcia, 2023-07-25 Help students use their voices to build an equitable and just society Years of political violence and protests against injustice have revived interest in teaching civics in schools The problem Civic education as it currently exists privileges systems not students It promotes incremental change within a broken democracy rather than responding to the youth led movements that call for the abolition of inequitable social structures What will it take to prepare young people for the just future they are fighting for Civics for the World to Come offers educators a framework for designing the critical civic education that our students deserve Synthesizing perspectives on democratic life from critical race theory ethnic studies Afrofuturism and critical literacy the book presents key practices for cultivating youth civic agency grounded in equity and justice The authors explore five world building civic skills Inquiry Storytelling Imagination Networking and Advocacy and introduce readers to real learning communities where students and educators are transforming themselves and society
