Life Sciences PSeptember 2012 Memo:

Science, Risk, and Policy Andrew J. Knight, 2016-04-14 For decades experts and the public have been at odds over the nature and magnitude of risks and how they should be mitigated through policy Experts argue that the fears of the public are irrational and that public policy should be based on sound science The public on the other hand is skeptical of experts and believe policy should represent their interests How do policy analysts make sense of these competing views Science Risk and Policy answers this question by examining how people evaluate evidence how science is conducted and how a multi disciplinary framework to risk can inform policy by bridging the gap between experts and the public This framework is then applied to four case studies pesticides genetically engineered foods climate change and nuclear power By tracing the history of the science policies and regulations and evaluating arguments made about these risks Andrew J Knight provides a guide to understand how experts and the public view risks

Chemical Control Michael Crowley, 2016-01-26 This thoroughly researched study highlights the international community's failure to regulate contemporary state research development marketing and or deployment of riot control agents and incapacitating chemical agent weapons

NASA Technical Memorandum, 1988 **Powerless Science?** Soraya Boudia, Nathalie Jas, 2014-01-01 In spite of decades of research on toxicants along with the growing role of scientific expertise in public policy and the unprecedented rise in the number of national and international institutions dealing with environmental health issues problems surrounding contaminants and their effects on health have never appeared so important sometimes to the point of appearing insurmountable This calls for a reconsideration of the roles of scientific knowledge and expertise in the definition and management of toxic issues which this book seeks to do It looks at complex historical social and political dynamics made up of public controversies environmental and health crises economic interests and political responses and demonstrates how and to what extent scientific knowledge about toxicants has been caught between scientific economic and political imperatives

Stress and Steroid regulation of synaptic transmission: from physiology to pathophysiology Menahem Segal, Harmen J. Krugers, Nicola Maggio, Recently several pioneering discoveries have identified new roles of stress and steroid hormones in modulating CNS functions Specifically glucocorticoids mineralocorticoids sex hormones and neurosteroids have been shown to affect synaptic receptors and ion channels and therefore regulate in a complex manner physiological processes ranging from homeostatic to cognitive functions Likewise in some disorders of the nervous system steroid hormones have been shown to play different roles either favoring or combating the disease process In this Frontier Research Topic we have put together leaders in the field to provide novel opinions on the effects of steroid hormones on synaptic transmission and plasticity from ion channels to pathophysiological processes We expect critical reviews of the work that has been conducted recently in this area and enrich these discussions with the novel exciting new findings
