is a poignant reminder of the often bleak reality of the disenfranchised and the power of photography to bear witness

Exiles Josef Koudelka, Robert Delpire, 1997 This collection of pictures by an acknowledged master of photography now updated to include 11 new images forms a document of the spiritual and physical state of exile The sense of private mystery that fills these photographs mostly taken during Koudelka's many years of wandering through Europe and the United States since leaving his native Czechoslovakia speaks of passion and reserve of his rage to see The images here interrogate and penetrate and reflect the nature of alienation

Camera Constructs Andrew Higgott, Timothy Wray, 2016-12-05 Photography and architecture have a uniquely powerful resonance architectural form provides the camera with the subject for some of its most compelling imagery while photography profoundly influences how architecture is represented imagined and produced Camera Constructs is the first book to reflect critically on the varied interactions of the different practices by which photographers artists architects theorists and historians engage with the relationship of the camera to architecture the city and the evolution of Modernism The title thus on the one hand opposes the medium of photography and the materiality of construction but on the other can be read as saying that the camera invariably constructs what it depicts the photograph is not a simple representation of an external reality but constructs its own meanings and reconstructs its subjects Twenty three essays by a wide range of historians and theorists are grouped under the themes of Modernism and the Published Photograph Architecture and the City Reimagined Interpretative Constructs and Photography in Design Practices They are preceded by an Introduction that comprehensively outlines the subject and

elaborates on the diverse historical and theoretical contexts of the authors approaches Camera Constructs provides a rich and highly original analysis of the relationship of photography to built form from the early modern period to the present day
