Multidimensional Journal Evaluation Stefanie Haustein, 2012-04-26 Scientific communication depends primarily on publishing in journals The most important indicator to determine the influence of a journal is the Impact Factor Since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical This book defines five dimensions which build a framework for a multidimensional method of journal evaluation The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011 **The Researcher's Journey** Klaus Solberg Söilen, 2025-07-01 Navigating the academic ecosystem involves a variety of challenges that extend beyond the application of research methods These challenges include understanding the university structure academic conferences publication strategy securing research funding and how modern technologies like artificial intelligence have changed the very purpose of researchers Written in an engaging and accessible tone this book guides advanced and early career researchers through the real world challenges that face academics in the social sciences The book is divided into three parts The first gives a brief history of the scientific method and social science research processes the second critically addresses the current state of research methods in the social sciences and the third discusses implications for ethics in light of scientific and technological advances Demystifying Scholarly Metrics Marc W. Vinyard, Jaimie Beth Colvin, 2022-02-25 Demystifying Scholarly Metrics gives librarians and faculty the confidence to navigate the maze of scholarly metrics identify quality journals in which to publish and measure the impact of scholarly works Both librarians and professors can be overwhelmed by the bewildering number of scholarly metrics This user friendly book demystifies them helping librarians become familiar with scholarly metrics and giving them the confidence to assist faculty at their institutions It also equips faculty authors with the knowledge to evaluate journals and use metrics to track their scholarly impact Several controversies exist in the scholarly metrics landscape including a disagreement between the proponents of altmetrics and traditional bibliometrics Even more contentious debates are breaking out over predatory journals and open access publishing Authors Mark Vinyard and Jaimie Beth Colvin who successfully launched a faculty publishing initiative explain which aspects of metrics are truly essential to grasp and they place these numbers in context They help readers identify the metrics that are the best fit for their scholarship and give librarians and professors the tools to make smart decisions in this changing scholarly metrics landscape **Research and Publication Ethics** Nimit Chowdhary, Sunayana, Monika Prakash, 2024-06-03 This book provides a comprehensive overview of research and publication ethics and guides young researchers on how to conduct ethical research and publish their work responsibly It presents an understanding of ethical practices in research and how they apply to research and publication by examining the different ethical theories and their application The book also discusses the different factors influencing ethical decision making and probes into the ethical issues that can arise in the research process It explores the different forms of scientific misconduct such as data fabrication and falsification plagiarism
