a relationship arising in the connections between those laying claim to being an authority and those who assent to it Matt Carlson examines the practices journalists use to legitimate their work professional orientation development of specific news forms and the personal narratives they circulate to support a privileged social place He then considers journalists relationships with the audiences sources technologies and critics that shape journalistic authority in the contemporary media environment Carlson argues that journalistic authority is always the product of complex and variable relationships Journalistic Authority weaves together journalists relationships with their audiences sources technologies and critics to present a new model for understanding journalism while advocating for practices we need in an age of fake news and shifting norms

Changes in Contemporary Ireland Catherine Rees, 2014-09-26 This volume explores the cultural literary theatrical and political changes in Irish society from 1980 The so called Celtic Tiger brought about cultural and economic rejuvenation in Ireland but this new found confidence and prosperity was destabilised by other events such as the scandals in the Catholic Church bringing into question the role of traditional institutions in contemporary Irish life The ending of the Troubles and signing of the Good Friday Agreement similarly heralded a new era in terms of positive political change but recent paramilitary activity threatens to undermine the progress made in the 1990s as waves of new violence hit the North Equally recent economic recession has halted the radical growth seen in the Republic over recent decades This book therefore problematises the concept of change and progress by juxtaposing these events and asking what real changes can be traced in modern Ireland The contributors frequently reflect on the changes and upheavals this period of dramatic economic political and cultural change has prompted The volume includes contributions from the fields of politics cultural studies sport history geography media and film studies and theatre and literature As such it is a decidedly interdisciplinary study exploring wide ranging topics and issues relevant to contemporary Irish Studies

of the conceptual and practical issues facing media ethics in a global world Focusing on the ethical concepts principles and questions in an era of major change this unique textbook explores the aims and norms that should guide the publication of stories that impact across borders and which affect a globally linked pluralistic world Through case studies analysis of emerging practices and theoretical discussion a team of leading journalism and communication experts investigate the impact of major global trends on responsible journalism and lead readers to better understand changes in media ethics Chapters look at how these changes promote or inhibit responsible journalism how such changes challenge existing standards and how media ethics can develop to take account of global news media In light of the fact that media journalism is now and will increasingly become multimedia in format and global in its scope and influence the book argues that global media impact entails global responsibilities It is therefore critical that media ethics rethinks its basic notions standards and practices from a more cosmopolitan perspective
