Journalism Studies Philip Hammond:

Cross-continental Views on Journalistic Skills Leen d'Haenens, Michaël Opgenhaffen, Maarten Corten, 2015-09-04 This book considers the role journalism education plays in coping with a changing media landscape. It looks at how journalists can empower themselves in an effort to excel in an evolving environment and considers whether it suffices for them to master pre-millennial basic skills or whether brand new competencies need to be incorporated. Few dramatic qualifications are spared when discussing the changes that have shaken the news environment during the noughties. Digitization has both empowered and tried professional journalists through multimedia news production, media convergence and not least a maturing commercial internet. Moreover, digitization has also influenced and been influenced by other societal changes such as global financial tensions, evolving multicultural societies and emerging democracies in search for a suitable journalistic paradigm. Indeed, the rather technological evolutions emphasized time and again cannot be detached from a cultural setting. This is why an investigation in required competencies benefits from an explicit socio-cultural and cross-continental perspective. As this book tackles a varied set of news ecosystems, it is our hope to offer a nuanced view on what indeed seems to be a global fluidity in journalism practice. Explicit emphasis is put on the role of journalism education as facilitator for and even innovator in required journalistic competencies. Time will tell whether or not news ecosystems will again stabilize. This volume makes a number of concrete recommendations towards journalism training and discusses a number of case studies across several continents illustrating how goals are attuned to a changed news environment. As this book links academic paradigms to concrete journalism practice and education, its reading is recommended both for practitioners and educators. This book was originally published as a special issue of *Journalism Practice*. **Routledge Handbook of Media, Conflict and Security** Piers Robinson, Philip Seib, Romy Frohlich, 2016-11-10 This Handbook links the growing body of media and conflict research with the field of security studies. The academic sub-field of media and conflict has developed and expanded greatly over the past two decades. Operating across a diverse range of academic disciplines, academics are studying the impact the media has on governments pursuing war, responses to humanitarian crises and violent political struggles and the role of the media as a facilitator of and a threat to both peace building and conflict prevention. This handbook seeks to consolidate existing knowledge by linking the body of conflict and media studies with work in security studies. The handbook is arranged into five parts: Theory and Principles; Media, the State and War; Media and Human Security; Media and Policymaking within the Security State; New Issues in Security and Conflict and Future Directions. For scholars of security studies, this handbook will provide a key point of reference for state of the art scholarship concerning the media security nexus for scholars of communication and media studies, the handbook will provide a comprehensive mapping of the media conflict field. **The Routledge Companion to British Media History** Martin Conboy, John Steel, 2014-09-15 The Routledge Companion to British Media History provides a comprehensive exploration of how different media have evolved within social, regional and

national contexts The 50 chapters in this volume written by an outstanding team of internationally respected scholars bring together current debates and issues within media history in this era of rapid change and also provide students and researchers with an essential collection of comparable media histories The Routledge Companion to British Media History provides an essential guide to key ideas issues concepts and debates in the field Chapter 40 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license <https://www.routledgehandbooks.com/doi/10.4324/9781315756202.ch40>

Propaganda, Power and Persuasion David Welch, 2013-11-27 As Philip Taylor has written The challenge of the modern information age is to ensure that no single propaganda source gains monopoly over the information and images that shape our thoughts If this happens the war propagandists will be back in business again Propaganda came of age in the Twentieth Century The development of mass and multi media offered a fertile ground for propaganda while global conflict provided the impetus needed for its growth Propaganda has however become a portmanteau word which can be interpreted in a number of different ways What are the characteristic features of propaganda and how can it be defined The distinguished contributors to this book trace the development of techniques of opinion management from the First World War to the current conflict in Afghanistan They reveal how state leaders and spin doctors operating at the behest of the state sought to shape popular attitudes at home and overseas endeavouring to harness new media with the objective of winning hearts and minds The book provides compelling evidence of how the study and practice of propaganda today is shaped by its history

Propaganda, the Press and Conflict David R. Willcox, 2005-09-19 An incisive analysis of the use of the press for propaganda purposes during conflicts using the first Gulf War and the intervention in Kosovo as case studies As the contemporary analysis of propaganda during conflict has tended to focus considerably upon visual and instant media coverage this book redresses the imbalance and contributes to the growing discourse on the role of the press in modern warfare Through an innovative comparative analysis of press treatment of the two conflicts it reveals the existence of five consistent propaganda themes portrayal of the leader figure portrayal of the enemy military threat threat to international stability and technological warfare As these themes construct a fluid model for the analysis and understanding of propaganda content in the press during conflicts involving British forces they also provide the background against which the author can discuss general issues regarding propaganda Amongst the issues which have become increasingly relevant to both recent academic debate and popular culture the author tackles the role of the journalist in war coverage the place of the press in a news market dominated by instant visual media and the effectiveness of propaganda in specific cultural and political context This book will appeal to advanced students and researchers in war studies media studies propaganda and psychology

Media Amnesia Laura Basu, 2018-04-20 From Donald Trump to Brexit and the rise of nationalist populism across Europe what role has the media played in shaping our current political moment Following the news coverage of a decade long crisis that includes the 2008 financial crash and the

Great Recession the UK deficit the eurozone crisis austerity and rising inequality we see that coverage is suffering from an acute amnesia about the policies that caused the crisis in the first place Rather than remembering its roots in the dynamics of free market capitalism the media remains devoted to a narrative of swollen public sectors out of control immigration and benefits cheats How has history been so quickly rewritten and what does this mean for attempts to solve the economic problems Going behind the coverage to decode the workings of media power Basu shows that without a rejection of neoliberal capitalism we ll be stuck in an infinite cycle of crisis

Media, War and Postmodernity Philip Hammond, 2007-10-10 Discussing theorists including Baudrillard and Virilio and covering conflicts including the two Gulf Wars Somalia Bosnia Haiti Rwanda Kosovo Afghanistan and the War on Terror this book investigates the new character of modern warfare and why media presentation of conflict is so central to both Western military operations and terrorists

Screens of Terror Phil Hammond, 2011 The essays in this collection first came together at a conference held at London South Bank University s Centre for Media and Culture Research in September 2010 on representations of the war on terror in film and television

Journalism Studies Andrew Calcutt, Philip Hammond, 2011-01-31 Journalism Studies is a polemical textbook aiming to rethink the field of journalism studies for the contemporary era

Journalism Studies Andrew Calcutt, Philip Hammond, 2011-01-31 As the world of politics and public affairs has gradually changed beyond recognition over the past two decades journalism too has been transformed yet the study of news and journalism often seems stuck with ideas and debates which have lost much of their critical purchase Journalism is at a crossroads it needs to reaffirm core values and rediscover key activities almost certainly in new forms or it risks losing its distinctive character as well as its commercial basis Journalism Studies is a polemical textbook that rethinks the field of journalism studies for the contemporary era Organised around three central themes ownership objectivity and the public Journalism Studies addresses the contexts in which journalism is produced practised and disseminated It outlines key issues and debates reviewing established lines of critique in relation to the state of contemporary journalism then offering alternative ways of approaching these issues seeking to reconceptualise them in order to suggest an agenda for change and development in both journalism studies and journalism itself Journalism Studies is a concise and accessible introduction to contemporary journalism studies and will be highly useful to undergraduate and postgraduate students on a range of Journalism Media and Communications courses

Climate Change and Post-Political Communication Philip Hammond, 2017-11-28 For many years the objective of environmental campaigners was to push climate change on to the agenda of political leaders and to encourage media attention to the issue By the first decade of the twenty first century it appeared that their efforts had been spectacularly successful Yet just at the moment when the campaigners goals were being achieved it seemed that the idea of getting the issue into mainstream discussion had been mistaken all along that the consensus building approach produced little or no meaningful action That is the problem of climate change as a post political issue which is the subject of this book Examining how climate change is communicated in politics news media and celebrity culture Climate Change and Post Political Communication explores how the issue has been taken up by elites as potentially offering a sense of purpose or mission in the absence of political visions of the future and considers the ways in which it provides a focus for much broader anxieties about a loss of modernist political agency and meaning Drawing on a wide range of literature and case studies and taking a critical and contextual approach to the analysis of climate change communication this book will be a valuable resource for students and scholars of environmental studies communication studies and media and film studies **Journalism & Mass Communication Directory** ,1997
