Wandiga,1997 **The Educator** ,2008 **Education World** ,2005 Differentiation and Articulation in Tertiary Education Systems Njuguna Ng'ethe,George Subotzky,George Afeti,2008 This paper explores an area of tertiary education that is currently understudied the extent and nature of differentiation and articulation in African tertiary education systems The overall finding of the study is that a binary system is dominant characterized by universities and polytechnics as distinct types of institutions Differentiation is clearly evident in Africa though mostly horizontal as opposed to vertical Articulation on the other hand seems to be in its infancy as some universities in their admission requirements do not recognize polytechnic qualifications and mobility between similar

institution types is rare National policy market forces institutional reforms industry and regional initiatives drive differentiation Resource constraints isomorphism governance and funding structures and the absence of debate over size and shape act as inhibitors Demand for access appears to be the only driver for articulation while national policies internal governance structures and industry labor market inhibit growth     *The OSSREA Newsletter* ,1997     **Theme** ,2014
