*The Global Factory* Peter J. Buckley,2018-02-23 This key new book synthesises Peter Buckley s work on the global factory the modern networked multinational enterprise The role of interfirm networks entrepreneurship and cooperation in the creation and management of global factories leads to a discussion of their governance internal knowledge transfer strategies and performance including their role in potentially combating societal failures Emerging country multinationals are examined as a special case of global factories with a focus on Indian and Chinese multinationals their involvement in tax havens and offshore financial centres the performance and processes of their acquisition strategies all seen as key aspects of globalisation

**Distance in International Business** Alain Verbeke,Jonas Puck,Rob van Tulder,2017-11-30 The twelfth volume in the Progress in International Business Research series presents extensive accounts of the contemporary scientific debate on how to assess the impacts of distance both negative and positive ones on the conduct of international business

**Location of International Business Activities** Academy of International Business .,2014-12-02 In recent years an extensive range of new research has been revisiting the topic of the location of international business activities from a variety of different perspectives and background interests This work has been inspired in part by two apparently quite different but actually related contemporary trends on the one hand an emergence or revitalization of clusters of activities co located in or around selected global city regions or fast growing metropolitan areas and on the other hand an increased global dispersion of activities conducted within the value chains managed or coordinated by many large multinational enterprises and their business partners The former trend has given rise to discussions of how the elite of the cultural cognitive economy of the 21st century in Allen Scott s terminology or the creative class Richard Florida s term are now being drawn or brought back to major urban centers while the latter trend is associated with debates over outsourcing and the economic and social consequences of shifts in the ownership and location of distinct nodes of value chains once production systems become more fragmented and the component parts of such systems become more geographically dispersed An increased interest in the subject of international business location has been shown by scholars in Strategic Management in Economic Geography and in Regional Science as well as in our own interdisciplinary field of International Business Studies However as is often the case in academic research communities these bodies of scholarship have tended to develop at something of a distance from

one another each conversing internally more than they have with one another Location of International Business Activities aims to promote a greater conversation between those interested in the topic of Location from various different backgrounds or starting points The articles are taken from a special issue on the theme of the Multinational in Geographic Space which was published by The Journal of International Business Studies in 2013 World Trade Report ,2021 The Quarterly Review of Economics and Finance ,2015 **Global Strategic Management** Philippe Lasserre,Felipe Monteiro,2022-11-03 Seamlessly blending academic rigour and practicality this textbook provides an introduction to global business strategy Assuming a born global perspective Global Strategic Management is supported by ample pedagogical features including numerous case studies and examples featuring both established multinationals and unknown SMEs from across the globe The book takes an applied approach to global business strategy emphasising functional parts of international business managing marketing operations HR and finance The text has been widely updated to incorporate the impacts of the Covid 19 pandemic such as work from anywhere and deglobalization New to this fifth edition is increased material on sustainability and corporate social responsibility including discussion of climate change NGOs and sustainable development goals Subjects such as the impact of technology cryptocurrency and global strategy in the digital space are discussed in more detail while the conflict in Ukraine is also considered **Indian Journal of Economics** ,2019 **GEO-5 for Business** Dave Grossman,2013 GEO 5 for Business builds on the findings of UNEPs fifth Global Environment Outlook GEO 5 report released in June 2012 GEO 5 assessed the current state and trends of the global environment in which population growth economic development urbanization and globalization are driving degradation across numerous environmental indicators Out of 90 environmental goals and objectives assessed in GEO 5 significant progress could only be shown for four Chapter 2 of the report briefly summarizes the drivers and trends described in GEO 5 Both the specific trends in GEO 5 and the broader picture of decline have significant implications for companies around the world regardless of size or sector some of which are reflected in the areas of Greenhouse gases Severe Weather Land Conversion Water Availability Water Pollution Biodiversity Chemical Exposure and Waste **Competitiveness of the ICT Sector in the Arab Region** ,2013 Developing countries have often focused on venture capital to boost investment Some Arab countries are proponents of that approach launching many funds geared towards the promotion of investment in the ICT sector While those initiatives are a step in the right direction they cannot succeed without complementary measures There are five major determinants for the establishment of a competitive ICT sector at the national level namely infrastructure education institutional quality innovation and investment Infrastructure must be solid resilient and affordable A high quality secondary and tertiary education system widespread e skills and digital literacy are also needed Furthermore a competitive ICT sector requires a clear political vision readiness to carry out regulatory reform and the rule of law After exploring the limitations of the ICT sector in the Arab region this study focuses on the role of innovation and investment in the establishment of a competitive ICT sector Innovation is

conceptualized as an ecosystem that includes entrepreneurs large and small companies accelerators venture capitalists business angels and government intermediaries Promoting investment requires an enabling business environment and a solid knowledge of the ICT sector Arab Governments must promote the development of various financing modes and mechanisms which include debt financing the establishment of primary and secondary capital markets The banking sector must be more actively involved and business angel networks and government support programmes must be established Publisher

description **Index de Périodiques Canadiens** ,2002 *Yojana* ,2014 **Africa Human Development Report 2012** ,2012 Sub Saharan Africa has the highest prevalence of hunger in the world Until this situation improves the human development prospects of millions of Africans will remain at risk UNDP s first Africa Human Development Report shows that food security and human development reinforce each other If African countries are to realise their long term potential the report says they must boost agricultural productivity to both improve the availability of food and reduce poverty Policies to enhance nutrition are central to ensuring that access to food translates into human development The report argues further that local populations must have the resources and decision making power to produce and consume nutritious food throughout the year overcoming the risks represented by continuing conflict climate change and variations in food prices

Journal of Economic Literature ,2014 OECD Economic Surveys: Indonesia 2012 OECD,2012-10-22 OECD s 2012 survey of Indonesia s economy examines recent economic developments policy and prospects Special chapters take a more detailed look at taxation and small and medium enterprise development *Industrial Development Report 2013* United Nations,2014-03-15 This Report demonstrates that a more sustainable energy future is within our reach and that industrial energy efficiency is key It shows how industrial energy efficiency can make a difference by providing a detailed comprehensive global assessment of potentials technologies economic benefits as well as cost and barriers to be removed It provides an overview of the policy instruments most useful for developing economies This innovative work also reminds us that we must act now if we are to unlock the potential of current and emerging energy efficiency technologies The opportunities are significant by reducing energy inputs per unit of output we will benefit from improvements in standards of living while protecting the environment Rethinking Development Strategies After the Financial Crisis Alfredo Fernando Calcagno,Sebastian Dullien,Alejandro Márquez-Velázquez,Nicolas Maystre,Jan Priewe,United Nations Conference on Trade and Development,Fachhochschule für Technik und Wirtschaft Berlin,2015 The recent economic trends and the challenges posed by the global crisis reinforce the importance of implementing strategies for development as opposed to leaving the economy to market forces Countries need a strategic compass for long run economic development either explicitly or implicitly Among other ingredients this comprises macroeconomic policies sectoral policies including the financial sector trade and industrial policies institution building in key areas and development friendly global governance Within a chosen medium or even long term strategy governments need more policy space to adjust to the specific and evolving social

historical and institutional context The experience of Asia shows that rather than implementing narrow and rigid general guidelines experimental approaches which require policy space are a recipe for success Furthermore the slow growth periods endured by several countries the lost decades allowed inferring which policies should be avoided The authors of this publication share the notion that developing countries can and should learn more from each other as well as from their own past experience It is important to look at comparisons between developing countries including both success and failure stories In this second volume seven country studies contribute to this approach From this perspective poor economic results in developing regions and transition economies in the 1980s and 1990s have to be compared with rapid output growth and social improvements in the two preceding decades as well as the 2000s Several factors have contributed to explaining these contrasts In particular the existence of a developmental State that uses its room for manoeuvre to act on both the supply and demand side is a common denominator of most successful experiences On the contrary neoliberal policies that restrained the role of the State in the economy and dismissed the need to preserve any policy space prevailed in the slow growing regions during the lost decades      *Kinh tế và phát triển* ,2018      **Nigerian Journal of Social Work Education** ,2014
