Life Sciences Research Of Rhino Poaching Grade 11:

Limpopo Life Anneli Ekblom, Michel Notelid, 2025-06-20 Limpopo Life introduces the reader to the material culture oral histories and the negotiation of conservation and landscape in an area now known as Limpopo National Park. Introducing the archaeology of a region that has not been surveyed or discussed, this book connects to the archaeology, history, heritage, and conservation discussions in the southern African region as a whole. Vegetation history and paleoecology are combined with archaeological surveys and excavations, written sources, oral histories, and travelogues to draw a picture of the diverse landscape of the Limpopo region. Intermixed within this narrative are sections that focus on an individual species, a life history, or an event providing a view of the complex and dynamic interactions. The role of humans in this diverse environment and how they have co-evolved with other species, shaping each other's destinies in a consequential and accidental way, is outlined. This book will be of interest to researchers and students interested in the archaeology, heritage, and conservation of Mozambique, Zimbabwe, and northern South Africa. It will also be of relevance to readers interested in the social history of the Limpopo and Kruger National Parks and this cross-border area. *New Scientist and Science Journal*, 1992 **New Scientist**, 1992 **Los Angeles Times**, 1975 *Newspaper Index: Los Angeles Times*, 1975 Transdex Index, 1994 An index to translations issued by the United States Joint Publications Research Service (JPRS) Chicago Tribune Index, 1992

Operation Lock and the War on Rhino Poaching John Hanks, 2015-05-08 The aggressive poaching of rhinos needs to be countered with equal aggression. So argued Prince Bernhard of the Netherlands, the founder-president of the World Wide Fund for Nature (WWF), at a 1987 meeting with John Hanks, conservation expert and WWF's head in Africa. The result was Operation Lock, a secret initiative funded by Prince Bernhard and staffed by former SAS operatives. Operation Lock set up headquarters in Johannesburg and extended its reach into neighbouring states: Namibia, Zambia, Botswana, Swaziland, and Mozambique. Its operatives planned to train game rangers to pose as rhino horn traders in order to entrap buyers and to expose the kingpins who were driving the trade. It was a controversial approach, all the more because it was working within apartheid South Africa in the late 1980s. When the existence of the project was finally leaked, WWF denied any involvement, and John Hanks took the fall. In *Operation Lock and the War on Rhino Poaching*, John Hanks finally tells the story of these explosive events from 25 years ago. As a leading international authority on conservation, he also deals with the scourge of rhino poaching up to the present and gives powerful and controversial criticism of some of the current policies to curb poaching. **Rhinos of the World** Mario Melletti, Bibhab Talukdar, David Balfour, 2025-02-20 This book represents the culmination of more than four years of work by many rhino experts, primarily from Africa, Asia, the United States, and Europe, involved in rhino conservation research and management. It is one of the most comprehensive reference works ever published on the systematics, ecology, conservation status, and management of all rhinoceros species. Covering all five rhino species worldwide, this volume brings together the contributions of 92 international rhino experts and provides a comprehensive

overview of the current state of knowledge on the evolution phylogeny systematics and fossil record of rhinos An in depth look at the ecology and conservation status of each species with detailed chapters A series of case studies on conservation management poaching horn trade and ex situ programs This beautifully illustrated book is an invaluable resource for researchers wildlife managers and professionals in conservation biology ecology and management as well as the general public It reveals the fascinating story of rhino evolution the long history of human interactions with rhinos and the major threats to these iconic species

Africa's Threatened Rhinos Keith Somerville, 2025-01-14 Africa's surviving rhinos are under serious threat Poaching for their horns massive extermination by sports hunters in the nineteenth and first half of the twentieth century and progressive habitat loss have all driven black and white rhino close to the edge This book considers human interactions with these magnificent and enigmatic animals charting hunting for food and hides and then hunting for horn to meet external demand for this much coveted commodity as well as peaceful coexistence over the course of three millennia With only two females alive in a closely protected reserve in Kenya the Northern White Rhino is on the brink of extinction The Southern White Rhino was increasing in numbers but poaching in South Africa Botswana and Namibia has now reduced the population to fewer than 20 000 while Black Rhino are hovering around the 6 000 6 500 mark also with the danger of extirpation everywhere but in parts of eastern and southern Africa Many books have been written on poaching and the decline of the rhino often from a very personal engaged viewpoint This volume takes the reader into important new territory showing how human agency has led to the situation we now face Covering the history of commercial and sporting exploitation of rhino it brings the picture up to date with an overview of contemporary conservation and anti poaching operations This urgent work is a significant contribution to our understanding of wildlife on the African continent
