Diverse Excursions in the Southeast: Paleozoic to Present Ann E. Holmes, 2015-03-09 This volume contains field guides to the 2015 GSA Southeastern Section Meeting's field trips. The guides explore geologic history and visit four regional geologic provinces: the Nashville dome, Blue Ridge Valley, and Ridge and Cumberland Plateau. **Research Handbook on**

Intellectual Property and the Life Sciences Duncan Matthews, Herbert Zech, 2017-06-30 Intellectual property (IP) is a key component of the life sciences, one of the most dynamic and innovative fields of technology today. At the same time, the relationship between IP and the life sciences raises new public policy dilemmas. The *Research Handbook on Intellectual Property and the Life Sciences* comprises contributions by leading experts from academia and industry to provide in-depth analyses of key topics including pharmaceuticals, diagnostics, and genes; plant innovations; stem cells; the role of competition law; and access to medicines. The *Research Handbook* focuses on the relationship between IP and the life sciences in Europe and the United States, complemented by country-specific case studies on Australia, Brazil, China, India, Japan, Kenya, South Africa, and Thailand to provide a truly international perspective. Dual-use life science research and biosecurity in the 21st

Century: Social, Technical, Policy, and Ethical Challenges Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011, scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications. The findings presented a modified variant of the H5N1 avian influenza virus, hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets. These results suggested a worrisome possibility: the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic. In response, a series of international discussions on the nature of dual-use life science research arose. These discussions addressed the complex social, technical, political, security, and ethical issues related to dual-use research. This *Research Topic* will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives. *International GAAP 2017* Ernst & Young LLP, 2017-02-16 IFRSs, the standards set by the

International Accounting Standards Board (IASB), are complex and sometimes obscure. Understanding their implications and applying them appropriately requires something special, and that is why *International GAAP 2017* is the essential tool for anyone applying, auditing, interpreting, regulating, studying, and teaching international financial reporting. It provides expert interpretation and practical guidance for busy professionals and includes in every chapter detailed analysis of how complex financial reporting problems can be resolved appropriately and effectively. The International Financial Reporting Group of Ernst & Young provides an explanation of relevant principles, a clear exposition of the requirements of IFRS, a discussion of the implications in practice, and possible alternative solutions. Available worked examples, extracts from real company accounts, a full listing of the required disclosures, an important part to play in the process of promoting consistent, comparable, and high-quality financial reporting under IFRS, a book that not only provides an analysis of the requirements of the standards and the
