Munns, Karin Nickelsen, 2021-06-01 From the beginning of the space age scientists and engineers have worked on systems to help humans survive for the astounding 28 500 days 78 years needed to reach another planet They've imagined and tried to create a little piece of Earth in a bubble travelling through space inside of which people could live for decades centuries or even millennia Far Beyond the Moon tells the dramatic story of engineering efforts by astronauts and scientists to create artificial habitats for humans in orbiting space stations as well as on journeys to Mars and beyond Along the way David P D Munns and Karin Nickelsen explore the often unglamorous but very real problem posed by long term life support How can we recycle biological wastes to create air water and even food in meticulously controlled artificial environments Together they draw attention to the unsung participants of the space program the sanitary engineers nutritionists plant physiologists bacteriologists and algologists who created and tested artificial environments for space based on chemical technologies of life support as well as the bioregenerative algae systems developed to reuse waste water and nutrients so that we might cope with a space journey of not just a few days but months or more likely years Tripping on Utopia Benjamin Breen, 2024-01-16 A Los Angeles Times Bestseller One of The New Yorker's best books of 2024 A bold and brilliant revisionist take on the history of psychedelics in the twentieth century illuminating how a culture of experimental drugs shaped the Cold War and the birth of Silicon Valley It was not the Baby Boomers who ushered in the first era of widespread drug experimentation It was their parents Far from the repressed traditionalists they are often painted as the generation that survived the second World War emerged with a profoundly ambitious sense of social experimentation In the 40s and 50s transformative drugs rapidly entered mainstream culture where they were not only legal but openly celebrated American physician John C Lilly infamously dosed dolphins and himself with LSD in a NASA funded effort to teach dolphins to talk A tripping Cary Grant mumbled into a Dictaphone about Hegel as astronaut John Glenn returned to Earth At the center of this revolution were the pioneering anthropologists and star crossed lovers Margaret Mead and Gregory Bateson Convinced the world was headed toward certain disaster Mead and Bateson made it their life's mission to reshape humanity through a new science of consciousness expansion but soon found themselves at odds with the government bodies who funded their work whose intentions were less than pure Mead and Bateson's partnership unlocks an untold chapter in the history of the twentieth century linking drug researchers with CIA agents outsider sexologists and the founders of the Information Age As we follow Mead and Bateson's fractured love affair from the malarial jungles of New Guinea to the temples of Bali from the espionage of WWII to the scientific revolutions of the Cold War a new origin story for psychedelic science emerges **Congressional Record** United States.
