Manual Spa Foot Treatment:

International Handbook of Massage Therapy (Volume -1) Dr. Jogiswar Goswami, Dr. Pankaj Pandey, This handbook isn't focused on massage techniques theory or anatomy. Instead, it's designed to guide practitioners on the entrepreneurial and client experience aspects of massage therapy. It covers how to become a successful professional in the field no matter the location by paying attention to the details that truly matter. *Spa Bodywork* Anne Williams, 2007. This textbook guides massage therapists through each step of delivering a spa treatment from consideration of the indications and contraindications to scope of practice issues, supplies, room set up, specific procedure steps and ideas for integrating massage techniques, spa products and enhancing accents. While wet room treatments are discussed, the focus is on dry room treatments which can be delivered in a wider variety of settings. More than 250 full color photographs illustrate each technique and treatment. Treatment Snapshot boxes provide a quick overview of the treatment before the detailed step by step procedures section. Sanitation Boxes offer clean up and sanitation tips. Sample Treatments include promotional descriptions, product recommendations and recipes for creating inviting smell scapes. Clinical Skills in Treating the Foot Warren Turner, Linda M. Merriman, 2005-08-17. The eagerly awaited new edition of *Clinical Skills in Treating the Foot* has been revised and updated with the needs of a broad range of health professionals in mind. For anyone treating patients with foot disorders, *Clinical Skills in Treating the Foot* will provide invaluable support through three key areas. Section 1 is concerned with the general principles of managing foot disorders and the context in which treatment of the foot takes place. Included are chapters on treatment planning, evidence based practice, governance and audit, clinical protocols, clinical emergencies and health promotion. Section 2 examines the application of clinical therapeutics to foot disease and includes chapters on operative techniques, surgery and the foot, pharmacology, physical therapy, mechanical therapeutics, chairside devices, prescription devices and footwear therapy. Section 3 considers the particular needs of special groups and includes chapters on the adult foot, the child's foot, sports injuries and management of tissue viability. With its clarity of text and liberal use of case studies and illustrations, the latest edition of *Clinical Skills* will be required reading for practising and student podiatrists. It will also be a valuable reference and guide for all others involved in the provision of treatment of the foot. This book has been written as a companion volume to the editors' *Assessment of the Lower Limb*, also published by Elsevier Churchill Livingstone. Written by an experienced team of clinicians who also understand the needs of students as well as practitioners, logical and clear structure makes it easy to use for both clinicians and students. Each chapter is self contained and can be used for independent reading. Topics, case histories and clinical comment sections illustrate important clinical points.
