Arthur James Wells, 2000 *Subject Guide to Books in Print*, 1983 *Children in Hospitality and Tourism* Hugues
Séraphin, Vanessa Gowreesunkar, 2020-09-07 This book works to fill a serious gap in tourism and hospitality research
children as future consumers For decades researchers and industry practitioners alike have overlooked and undervalued the
significance of children's perspectives and their influence as decision makers However the United Nations Convention on the
Rights of the Child 1989 emphasizes that children have the right to participate in matters that affect them With this in mind
the contributors to this edited collection draw attention to children as thinkers actors and transformers of the future of the
tourism and hospitality industry Through a mix of conceptual and empirical chapters the book collectively supports an
overarching theme the empowerment of children as present and future consumers should be a core component of any
sustainable tourism initiative Towards this goal the chapters herein represent internationally diverse perspectives and offer a
number of innovative recommendations to the industry's practitioners **Books in Print**, 1991 *Publishers' Circular and*

1976 to 1982 British Library, 1983 *Stochastic Modeling of AIDS Epidemiology and HIV Pathogenesis* W. Y. Tan, 2000
This book discusses systematically treatment on the development of stochastic statistical and state space models of the HIV
epidemic and of HIV pathogenesis in HIV infected individuals and presents the applications of these models The book is
unique in several ways 1 it uses stochastic difference and differential equations to present the stochastic models of the HIV
epidemic and HIV pathogenesis in this sense the deterministic models are considered as special cases when the numbers of
different type of people or cells are very large 2 it provides a critical analysis of deterministic and statistical models in the
literature 3 it develops state space models by combining stochastic models and statistical models and 4 it provides a detailed
discussion on the pros and cons of the different modeling approaches This book is the first to introduce state space models
for the HIV epidemic It is also the first to develop stochastic models and state space models for the HIV pathogenesis in HIV
infected individuals *The Publishers' Trade List Annual*, 1985 *Current Catalog* National Library of Medicine
