Someone Is Hiding Something

Richard Belzer, George Noory, David Wayne, 2015-02-17 A year after the disappearance and commencement of the international search for Malaysia Airlines Flight 370 no sign of the plane has been found no debris no bodies no sign of the much talked about black box Richard Belzer George Noory and David Wayne want to know why Scrutinizing the theories the media and politicians claim are the most likely reasons the plane crashed Belzer Noory and Wayne argue that if a year after a huge Boeing 777 has gone missing and there's still no sign of it whatsoever it's time to think outside the box The public needs to stop being misled If a plane and its passengers went missing once what's to stop it from happening again Some of the theories the authors consider seem implausible on the surface but the thorough research they've done and the continual failure of politicians aviation authorities and military members around the world to give any indication they're wrong makes their arguments as good if not better than the more widely shared ones The title of this thought provoking volume Someone is Hiding Something is a line spoken by former Malaysian Prime Minister Mahathir Mohamad perhaps the only government official to publicly acknowledge the true reason that neither Flight 370 nor the 239 people onboard have been found The Vanishing of Flight MH370 Richard Quest, 2016-03-08 CNN Aviation Correspondent Richard Quest offers a gripping and definitive account of the disappearance of Malaysian Airline Flight MH370 in March 2014 On March 8 2014 Malaysian Airlines Flight MH370 disappeared with barely a trace carrying 239 people on board seemingly vanishing into the dark night The airplane's whereabouts and fate would quickly become one of the biggest aviation mysteries of our time Richard Quest CNN's Aviation Correspondent was one of the leading journalists covering the story In a coincidence Quest had interviewed one of the two pilots a few weeks before the disappearance It is here that he begins his gripping account of those tense weeks in March presenting a fascinating chronicle of an international search effort which despite years of searching and tens of millions of dollars spent has failed to find the plane Quest dissects what happened in the hours following the plane's disappearance and chronicles the days and weeks of searching which led to nothing but increasing despair He takes apart the varying responses from authorities and the discrepancies in reports the wide range of theories the startling fact that the plane actually turned around and flew in the opposite direction and what solutions the aviation industry must now implement to ensure it never happens again What emerges is a riveting chronicle of a tragedy that continues to baffle everyone from aviation experts to satellite engineers to politicians and which to this day worries the traveling public that it could happen again INCLUDES PHOTOS *Flight MH370 - The Mystery* Nigel Cawthorne, 2014-05-15 On the 8th of March at 00 41 Malaysia Airlines Flight MH370 took off from Kuala Lumpur International Airport At 01 19 the pilot bid air traffic control good night Two minutes later the plane and its 227 passengers vanished from the skies To date no trace of the aircraft has been found Experienced author and journalist Nigel Cawthorne has researched the case with incredible thoroughness

revealing the most compelling explanations behind the mystery which has gripped the world *The Hunt for MH370* Ean Higgins, 2019-02-26 A staggering meticulous and frequently spine chilling work of longform journalism Trent Dalton

Somewhere deep beneath the wild seas of the southern Indian Ocean perhaps in the eerie underwater canyons of Broken Ridge along the Seventh Arc satellite band lies the answer to the world's greatest aviation mystery Why on the night of 8 March 2014 did Malaysia Airlines Flight MH370 suddenly U turn zig zag up the Straits of Malacca then vanish with 239 souls on board Was it an elaborate murder suicide by a rogue pilot A terrible accident such as onboard fire rapid decompression or systems failure A terrorist hijacking gone wrong Or something else entirely Award winning journalist Ean Higgins has led the world media's coverage of this incredible saga and draws on years of interviews with aviation experts victims families air crash investigators and professional hunters across land sea and sky to dissect the riddle of MH370's fate PRAISE FOR THE HUNT FOR MH370 The Hunt for MH370 is a riveting page turner written with the drama and intrigue of a thriller Piece by tantalising piece Ean Higgins unpuzzles this most baffling of mysteries asking dangerous questions and revealing shocking truths Dick Smith The disappearance of MH370 remains the greatest and most pressing mystery in aviation history that demands answers for both the families of the stricken passengers and the travelling public No journalist has been more relentless in the pursuit of the truth of MH370 than Ean Higgins The Hunt for MH370 is an engrossing book in which Higgins has meticulously pieced together the puzzle of the doomed flight from its vanishing to the flawed investigation and the largest maritime search ever that leads the reader to a chilling conclusion that is almost impossible to comprehend Paul Whittaker Chief Executive Sky News and former editor in chief The Australian *Malaysia Airlines Flight 370* David Soucie, 2015-02-17 On March 8 2014 Malaysia Airlines Flight 370 loaded 239 people on board and took off for what should have been a six hour flight It never made it and it's still missing It's been a year since Malaysia Airlines Flight 370 vanished and there's still no sign of the aircraft its passengers or its crew nor confirmation of what happened or where the aircraft resides In this gripping investigation of the events that led to the plane's disappearance and why they could happen again CNN aviation analyst David Soucie exposes the flaws in the aviation industry shares what needs to be done so a plane doesn't go missing again and uses a Bayesian analysis model to reveal what most likely happened on board the plane that led to its downfall Comprehensive in scope personal and empathetic in voice Soucie draws on his thirty years of experience as an accident investigator working with the Federal Aviation Administration He allows you to put the wild speculation about the plane's disappearance aside and assess the facts through the eyes of an experienced accident investigator **Into Oblivion** Samir Kohli, Pranav Kohli, 2014-07-22 Into Oblivion presents a comprehensive scientific evaluation of each and every theory regarding the disappearance of Malaysia Airlines flight MH370 While this book doesn't speculate about how and why the flight was lost it scientifically interprets whatever little evidence is available at this time An explanation of the scientific basis of the search techniques and methodology has also been provided in this book Into Oblivion therefore seeks not to

sensationalize or speculate but only to inform and educate by sifting fact from fiction Into Oblivion is a must read for all those intrigued by the sudden and as yet unexplained disappearance of MH370 This book does not tell you what happened to MH370 If you seek a book that explains what happened to the flight then this is not the book for you At the time of writing there is insufficient evidence to arrive at any conclusion regarding what actually happened to MH370 This book merely states the facts without any speculation and explains how they should be interpreted based on the available scientific and historical data The reason for writing this book is to state the facts explain them and differentiate between what the facts represent scientifically and what amounts to conjecture Then based on the facts available draw some scientific conclusions on the basis of which the many theories that abound in the media today can be evaluated and either considered plausible subject to further evidence or rejected altogether Various technical terms that are being frequently used in relation to this incident have also been explained An explanation has also been given of the technology that is being used in the search along with some basic scientific data to help the reader understand the complexities involved in this operation The reason and focus of this book lies in truth and where there is no truth known at this time in scientific and data driven analysis of all possibilities No speculation no allegations and certainly no favorite theory Every theory out there is just as good as the other in the absence of any proof Lastly if you re looking to read an emotional account of this tragedy then this book is not for you I have no interviews with any of victims family members because I believe that people need to be allowed to grieve in private This book focuses on pure science and facts and on weighing not counting the evidence exactly the way an Accident Investigator is expected to

the plane into the side of a mountain in the Alps killing all on board Since the invention of radio radar satellite navigation and the internet the world has become a smaller place The answer must be out there Or perhaps hidden within the pages of the secret files Last Flights Of Malaysian Airlines Mh370 And Mh17, The: A Firsthand-look Azharuddin Abdul

Rahman,2022-10-14 Having always been in love with all things related to aviation since childhood Azharuddin Abdul Rahman's dream came true when he was given a chance to enter the field of aircraft engineering Serving as Director General for eleven years with the Department of Civil Aviation DCA he had had many valuable experiences However the two biggest tragedies that occurred in 2014 that of MH370 and MH17 had the greatest impact on his life and affected not just the victims and their families but the entire Malaysian aviation industry Azharuddin was directly involved in leading the search missions of the tragic disappearance of MH370 on 8 March 2014 and in a series of investigations concerning the downing of MH17 in eastern Ukraine on 17 July of the same year As Director General Azharuddin faced a heavy burden in the aftermath of the twin disasters of which MH370 remains unsolved to the present day No one was prepared for the MH370 tragedy despite all the training they had received As for MH17 Azharuddin laments that the tragedy may have been prevented had full information on the level of conflict in Ukraine been made available during that time In both cases all passengers and crew on board were killed Both tragic events marked a new history in the aviation industry both in Malaysia and in the international arena causing new reforms to burst into action to ensure similar incidents will not happen again In writing this book Azharuddin draws from personal experience conducting his research with and around aviation industry professionals and drawing insights from others involved in both incidents to present a full and raw take on the twin disasters of the Malaysian aviation industry in 2014 *MH370* Larry Vance,2018-05-23 On March 8th 2014 Malaysia Airlines Flight 370 with 239 people on board disappeared into the dark of the night never to be heard from again The disappearance of MH370 has been described as the greatest mystery in the history of aviation Despite the efforts of an international investigation team and millions of dollars spent searching the ocean bottom for the wreckage site no one has been able to determine what really happened Until now For this book three professional accident investigators each with decades of real world experience in crash dynamics examined the available evidence The results of their work reveal the actual sequence of events and what really happened to MH370 This book uses plain language easy to understand schematics and clear photos of the actual wreckage to bring the evidence to life Even those with little or no aviation connection will be able to understand and appreciate the validity of this eye opening analysis You will see that the official investigation was deficient They missed or misinterpreted crucial evidence that was available on the recovered wreckage pieces Therefore they used incorrect assumptions about what was happening onboard MH370 when they calculated the boundaries for their search zones This book will reveal why the multi million dollar ocean bottom search efforts had almost no chance of success You will be guided through a basic investigation and analysis process to show what caused MH370 to disappear from radar and to fly on an

unexplained and mysterious track that led to the southern Indian Ocean Many people have presented theories to try to explain the MH370 disappearance This book shows you a basic investigation framework where theories that are based on speculation and guesswork can be invalidated You are left with only one scenario that is totally based on confirmed facts The known and indisputable evidence fits with only one chain of events and that is the chain of events presented by the author With this book the mystery of MH370 has been solved *MH370: the Secret Files* Nigel Cawthorne,2016-03-03 On 8 March 2014 Malaysia Airlines Flight 370 took off from Kuala Lumpur International Airport bound for Beijing Less than an hour after take off somewhere over the South China Sea the plane simply vanished One eyewitness saw a burning object crash into the sea But confusing radar signals trace tracked an aircraft taking an erratic course across the Malaysian peninsula then on to the Andaman Sea Did it crash there Or did it fly on to land safely in disputed lands of Central Asia or the top secret CIA black site on Diego Garcia Data from the Rolls Royce engines tracked by Inmarsat was said to indicate that it might have ditched in the furthest reaches of the South Indian Ocean We know more about the surface of the moon than the bottom of the sea there And the weather and currents are so bad it may never be found Convenient Two years later the Australians are still search at the cost of billions and have found nothing But was the search in such a remote place part of a cover up to distract the world s attention because the US Navy had in fact shot the plane down Since the invention of radio radar satellite navigation and the internet the world has become a smaller place The answer must be out there Or perhaps hidden within the pages of the secret files *MH370 Explains* Debora Azbell,2021-07-05 Malaysia Airlines Flight 370 was a scheduled international passenger flight operated by Malaysia Airlines that disappeared on 8 March 2014 while flying from Kuala Lumpur International Airport to its planned destination Beijing Capital International Airport Five years after a state of the art Boeing 777 vanished into the night over the South China Sea the renowned science and aviation author of the book offers a compelling and detailed account of what happened that night and in the months and years that followed *The Last Flights of Malaysian Airlines MH370 and MH17* Azharuddin Abdul Rahman,2022-10-14 Having always been in love with all things related to aviation since childhood Azharuddin Abdul Rahman s dream came true when he was given a chance to enter the field of aircraft engineering Serving as Director General for eleven years with the Department of Civil Aviation DCA he had had many valuable experiences However the two biggest tragedies that occurred in 2014 that of MH370 and MH17 had the greatest impact on his life and affected not just the victims and their families but the entire Malaysian aviation industry Azharuddin was directly involved in leading the search missions of the tragic disappearance of MH370 on 8 March 2014 and in a series of investigations concerning the downing of MH17 in eastern Ukraine on 17 July of the same year As Director General Azharuddin faced a heavy burden in the aftermath of the twin disasters of which MH370 remains unsolved to the present day No one was prepared for the MH370 tragedy despite all the training they had received As for MH17 Azharuddin laments that the tragedy may have been prevented had full information on the level of conflict in Ukraine been made

available during that time In both cases all passengers and crew on board were killed Both tragic events marked a new history in the aviation industry both in Malaysia and in the international arena causing new reforms to burst into action to ensure similar incidents will not happen again In writing this book Azharuddin draws from personal experience conducting his research with and around aviation industry professionals and drawing insights from others involved in both incidents to present a full and raw take on the twin disasters of the Malaysian aviation industry in 2014

Malaysia Flight Mh370 - Lost in the Dark John P. Choisser, 2014 The missing flight isn't in the news quite as much now The pings have stopped and the search is entering a second much slower phase The unanswered questions are many But by most accounts it is being assumed that the pilots are criminals suicidal maniacs hijackers or terrorists since no one else on the airplane appears to fit those descriptions It may be a long time before we know for sure but in the meantime I believe the public and particularly the pilot's families need to know that there is a high likelihood that they are victims and heroic victims at that The purpose of this book is also not to place blame on anyone in particular although as we'll see there might have been an opportunity to save the airplane In the news there does not seem to be much credibility given to the possibility that what happened was an accident A rare accident we hope but an accident nonetheless But even given an accident can blame be placed for making the situation worse Could there have been negligence in avoiding the escalation of an accident into a disaster I say yes I believe we can place blame for this and it's not on the pilots Knowing more about how the airplane and its various systems work will help members of the public more accurately judge the relevancy of the various scenarios being discussed I can imagine some of my friend's eyes glazing over while reading some of the technical information presented in this book And skimming over those sections or skipping them is OK But these are the bases for the conclusions I reach so you can either read them or take them on faith This kind of knowledge will also answer questions like why didn't the passengers answer their cell phones and was someone hiding in the cargo bay and how can the airplane fly by itself and a hacker got into the flight computer and flew the airplane If we keep speculation grounded in the real world based on how things actually work and don't work some of the more realistic theories can be better evaluated That's why there is so much engineering stuff in this book which you may want to skip over It's there as much to explain what is impossible as much as what things are possible My hypothesis is that the pilots are heroes Lost in the dark without flight instruments with smoke in the cockpit flying under extreme stress and awesome responsibility and hoping against hope to see a fighter interceptor outside their window to guide them home they knew the minutes left on their oxygen system were numbered They have not survived their ordeal and in my opinion died trying to save the flight And this small book will not bring solace to the families of the rest of the crew and passengers But the dedicated effort the pilots and crew probably made amidst the terror and confusion may be worthy of hero status I feel for all of the victims families but especially for the families of the pilots who are not only grieving but whose probably heroic loved ones are perhaps necessarily but unfortunately being labeled otherwise

The Secret of

the Seventh Arc: The Story About the Disappearance of the Malaysian Flight MH-370 Milos Jesensky, Stanislaw Bednarz, Robert Lesniakiewicz, 2021-01-15 It is an unheard of case A huge flying machine measuring 60 x 64 m and weighing 300 tons disappears without a trace in the gloom of the Malayan night The search for six years is still fruitless and there is not even a fixed location for a possible catastrophe And it would seem that it was all happening in a world where satellites and sensors are able to hear a mouse sneeze from thousands of kilometers away and despite all this the waters of the Indian Ocean or any other sea were forever closed over MH 370 After all we do not even know where the plane flew after the pilots turned off its transponder One can only make assumptions and hypotheses It is incomprehensible for us maybe all this happened in an area bristling with radar stations and other air traffic detection devices And nobody has seen anything nobody knows anything Hundreds of ships pass daily in waters with increased sea traffic And yet no one knows what happened We wanted to present the reader with the development of the situation and new searches and new hopes for finding missing people and the airplane Some are factual some are quite fantastic
