Source Material (Provide a direct quotation or paraphrase and a parenthetical citation)	Page #	Respond, Analyze, and Evaluate (Why do you find this passage interesting or important?)
<p>(What are you analyzing?)</p> <p style="text-align: center;"><i>Simile</i></p> <p>“The snow was like a carpet, very gentle, very warm” (83).</p>	83	<p><i>I can picture the men standing in the concentration camp, watching the snow blanket the ground. It is silent there. The snow-covered ground is smooth and soft. Wiesel describes the snow as being “gentle” and “warm.” This comparison is not what one would expect. Standing barefoot in the snow would be very painful. The cold would cut deep into one’s feet. So why does he say it is warm? Maybe his feet are frozen, numb to the pain. Perhaps the snow provides insulation from night’s bitter cold. This comparison creates a sense of peace, a moment without terror and fear. It is as if he is home again, safe and warm. 111 words</i></p>
<p>(What are you analyzing?)</p> <p style="text-align: center;"><i>Personification/ Internal Conflict</i></p> <p>“Death wrapped itself around me till I was stifled. It stuck to me. I felt that I could touch it. The idea of dying, of no longer being, began to fascinate me. Not to exist any longer” (82).</p>	82	<p><i>This is a sad moment for Elie. He has fought to survive, but cannot fight any longer. I can’t imagine being fourteen and wanting to die. I can’t imagine being fourteen and losing my family, my dignity, my soul. What a tragedy. In this passage, Wiesel personifies death to show the control it has over those who are suffering in the camps. In this case, Death silences Elie, overpowering his will and subduing his hope of survival. Elie is conflicted. He wants to survive. He wants to take care of his father. But he doesn’t know how much more he can take. This is important because we see that Elie has reached a breaking point. Death has come for him so many times but has failed. This time, however, Elie is too tired to run, too tired to fight. He has had enough. Death is offering a gift—an escape from this hellish existence. 153 words</i></p>

Understanding Adorno, Understanding Modernism Robin Truth Goodman, 2020-11-12 Having studied philosophy at a time when its traditions were

being seriously uprooted by the atrocities of World War II Theodor Adorno had an enormous impact on thinking about aesthetics at a transitional historical moment when the philosophy of science and leftist politics were looking for new ground Moreover with his focus on the rise of commercial culture and its effects on identity construction Adorno can be said to have reinvigorated modernist concerns by introducing the prevailing terms in our contemporary versions of cultural politics and cultural studies Understanding Adorno Understanding Modernism traces Adorno's social and aesthetic ideas as they appear and reappear in his corpus As per other volumes in the series this book is divided into three parts The first Adorno's Keywords is organized by the aesthetic terms around which Adorno's philosophy circulates The second section is devoted to Adorno and Aesthetics While Adorno's philosophical viewpoints influenced modernism's evolution into the 21st century the history of modernist aesthetics also shaped his philosophical approaches The third and final part Adorno's Constellations discusses how aesthetic form in Adorno's thinking underlies the terms of his social analysis

Experimental Psychology, Cognition, and Human Aging Donald H. Kausler, 2012-12-06 This book is a major revision and extension of my earlier book *Experimental Psychology and Human Aging* which appeared in 1982 The intervening years have seen a remarkable expansion of psychological research on human aging especially on topics dealing with cognition They have also seen research on cognitive aging gain increasing importance within the mainstream of basic cognitive research As my lecture notes for my course in the psychology of aging grew so did my apprehension regarding the task ahead of me in revising the first edition The research explosion in cognitive aging forced several major changes in content from the first to the second edition Two chapters on learning and memory in the first edition were necessarily expanded to six chapters in the present edition Similarly the single prior chapter on perception and attention became two chapters as did the single prior chapter on thinking Another change from the first edition is in the addition of some review of the effects of abnormal aging on various cognitive processes particularly in regard to memory functioning To keep the revision within reasonable length some sacrifices had to be made The multiple chapters on methodology and theory in the first edition were condensed into the present single chapter However the major topics from the first edition were retained and in fact added to by the inclusion of important topics and issues that emerged over the past eight years

Aggression and Violence David M. Stoff, Robert B. Cairns, 2014-02-04 Conceived at a time when biological research on aggression and violence was drawn into controversy because of sociopolitical questions about its study this volume provides an up to date

account of recent biological studies performed mostly on humans A group of scientists recognized the importance of freedom of inquiry and deemed it vital to address the most promising biological research in the field The focus on biological mechanisms is not meant to imply that biological variables are paramount as a determinant of violence Rather biological variables operate in conjunction with other variables contributing to aggression or violence and a complete understanding of this phenomenon requires consideration of all influences bearing on it This book will familiarize readers with the rapidly growing and increasingly significant body of knowledge on the biological bases of human antisocial aggressive and violent behaviors The editors concentrated on biological influences that support the basic physiological and biochemical processes of the brain and did not cover those biological influences that impact on the health of the individual such as head injury pregnancy and birth complications diet and exposure to lead and other toxins They focused on biological influences to illuminate their role in the complex behavioral phenomenon of violence Three different approaches to the biological study of human antisocial aggressive and violent behaviors are represented genetic neurobiological and biosocial Representing each of these three approaches individual chapters from investigators in psychobiology biological psychiatry and basic clinical neurosciences address the most recent experimental findings methods theory and common misconceptions in the biological study of aggression and violence The areas of primary focus are behavior and molecular genetics neurochemistry and hormones neuroimaging psychophysiology and developmental psychobiology Generally speaking investigators following these different approaches have experience in different scientific backgrounds select different methods generate different analyses employ different conceptual definitions for some of the same terms and assume a different philosophical stance in attempting to explain violence Nevertheless all are united in their efforts to understand the biological underpinnings of violence This book then assumes a comprehensive approach wherein different levels of analysis and different approaches inform each other It is clear from the studies reported that aggression and violence are multidetermined phenomena and understanding them requires an interdisciplinary approach spanning economic sociopolitical psychological sociological and criminological as well as biomedical considerations Nature biology and nurture experience context are fundamentally inseparable in explaining aggression and violence biology may affect experience or context but experience or context also influences biology Both need to be studied in a search for explanations of this phenomena
