Micromammals And Macroparasites From Evolutionary Ecology To Management:

Micromammals and Macroparasites S. Morand, B.R. Krasnov, R. Poulin, 2007-01-27 Small mammals are among the most ubiquitous and important components of terrestrial ecosystems They have coevolved and now coexist with a diverse array of parasites such that not only are all aspects of their biology influenced by parasitism but they also play key roles in the transmission and maintenance of parasitic diseases This book provides a comprehensive survey of the diversity and biology of metazoan parasites affecting small mammals of their impact on host individuals and populations and of the management implications of these parasites for conservation biology and human welfare Designed for a broad multidisciplinary audience it will be an essential resource for researchers students and practitioners alike in the fields of parasitology evolutionary ecology wildlife management and conservation biology

Micromammals and Macroparasites S. Morand, B.R. Krasnov, R. Poulin, 2009-09-03 This book provides a comprehensive survey of the diversity and biology of metazoan parasites affecting small mammals of their impact on host individuals and populations and of the management implications of these parasites for conservation biology and human welfare Designed for a broad multidisciplinary audience the book is an essential resource for researchers students and practitioners alike

Micromammals and Macroparasites S. Morand, 2006 Small mammals are among the most ubiquitous and important components of terrestrial ecosystems This book provides a survey of the diversity and biology of metazoan parasites affecting small mammals of their impact on host individuals and populations and the management implications of these parasites for conservation biology and human welfare

Recent Advances in the Ecology and Evolution of the Bathyergidae Stan Braude, Sabine Begall, Susanne Holtze, Nigel Bennett, 2022-11-14

Submissions will address new discoveries about the ecology and evolution of one or more bathyergid mole rat species While some background may be appropriate the focus should be on new or less widely known discoveries Naked mole rats may be included but will not be disproportionately represented Publisher's description viewed August 17 2023

The Biogeography of Host-Parasite Interactions Serge Morand, Boris R. Krasnov, 2010-07 This edited volume demonstrates how the latest developments in biogeography for example in phylogenetics macroecology and geographic information systems can be applied to studies in the evolutionary ecology of host parasite interactions in order to integrate spatial patterns with ecological theory

Current Progress in Biological Research Marina Silva-Opps, 2013-04-24 Current Progress in Biological Research presents new insights into key topics from different areas of the biological sciences Some of the topics covered in the book are antibiotic susceptibility genomic rearrangement historical biogeography biogeographic patterns endemism and the use of microorganisms for pest control The book is an interesting collection of 16 original research articles written by respected experts in their fields It is hoped that readers will be stimulated and challenged by the contents of this book

Community Ecology Gary G. Mittelbach, Brian J. McGill, 2019-05-24 Community ecology has undergone a transformation in recent years from a discipline largely focused on processes occurring within a local area to a

discipline encompassing a much richer domain of study including the linkages between communities separated in space metacommunity dynamics niche and neutral theory the interplay between ecology and evolution eco evolutionary dynamics and the influence of historical and regional processes in shaping patterns of biodiversity To fully understand these new developments however students continue to need a strong foundation in the study of species interactions and how these interactions are assembled into food webs and other ecological networks This new edition fulfils the book s original aims both as a much needed up to date and accessible introduction to modern community ecology and in identifying the important questions that are yet to be answered This research driven textbook introduces state of the art community ecology to a new generation of students adopting reasoned and balanced perspectives on as yet unresolved issues Community Ecology is suitable for advanced undergraduates graduate students and researchers seeking a broad up to date coverage of ecological concepts at the community level

Describing the Spatial Distribution of Parasites on Peromyscus Species in Southern Michigan Erica L. Activity Patterns in Small Mammals S. Halle, N.C. Stenseth, 2000-07-06 Environmental conditions change considerably in the course of 24 h with respect to abiotic factors and intra and interspecific interactions These changes result in limited time windows of opportunity for animal activities and hence the question of when to do what is subject to fitness maximisation This volume gives a current overview of theoretical considerations and empirical findings of activity patterns in small mammals a group in which the energetic and ecological constraints are particularly severe and the diversity of activity patterns is particularly high Following a comparative ecological approach for the first time activity timing is consequently treated in terms of behavioural and evolutionary ecology providing the conceptual framework for chronoecology as a new subdiscipline within behavioural ecology An extensive Appendix gives an introduction to methods of activity modelling and to tools for statistical pattern analysis

Evolutionary Ecology of Marsupials Anthony Kingston Lee, Andrew Cockburn, 1985-03-21 This book documents the excellent potential the study of marsupials provides for resolution of theoretical questions of general importance in biology

Patterns in the Structure of Mammalian Communities Douglas W. Morris, Zvika Abramsky, 1989 Addresses the evolutionary ecology of various closely related well known mammals Contributions address issues of habitat selection species interaction distribution abundance and diversity Habitats under study include deserts tropical and boreal forests heaths swamps and savannas No index Annotation copyrighted by Book News Inc Portland OR
