

General

This section covers the repairs related to the clutch, manual and automatic transmissions, shift linkages, driveshafts, and transfer case (all wheel drive vehicles only). For repairs related to drive axles and front and rear final drive differentials, see ⇒ [311 Front Axle Final Drive](#) and ⇒ [331 Rear Axle Final Drive](#).

Drivetrain

E46 models are equipped with a longitudinal drivetrain. The transmission is bolted directly to the rear of the engine. In rear wheel drive models, a driveshaft connects the output shaft of the transmission to the rear final drive. On all wheel drive models, a transfer case is mounted to the rear of the transmission, with drive shafts leading to front and rear final drive assemblies. Individual drive axles with integrated constant velocity joints transfer rotational power from the final drive units to the drive wheels.

Manual transmission

Due to different power characteristics and performance requirements, three different manual transmissions are used in models covered by this manual. Manual transmission applications are given in ⇒ [Table a Manual transmission applications](#).

Note:

For transmission gear ratio information and repair information, see ⇒ [230 Manual Transmission](#).
