Microbiological Clinical Hygiene:

Microbiological Clinical Hygiene Elias Hakalehto, 2015 This book describes the issues of human health and healthcare from the point of view of hygiene monitoring and maintenance Also the perspectives on the effects of microbial cell structures metabolism communities and interactions on health and hygiene are included Besides microbiological screening of patients surfaces air space etc this book introduces some key bacteriological virological and fungal risks in the clinical setting It describes routes of contamination inside hospitals and into our body The means for prevention of the spreading of unwanted microbes are presented as well Protection mechanisms of the bodily system and the balances of the human microbiome are discussed with respect to intrusions via the respiratory or digestive systems or damaged skin The risks during operations or invasive treatments are highlighted together with means for avoiding them Examples of biofilm formation on the devices or on the body surfaces latent infections contagion mechanisms as well as prevalent risks such as mycobacterial infections antibiotic resistant strains intracellular pathogens nosocomial viruses lowered host defences Clostridium difficile salmonellas legionellas are included in the chapters of this book Important developments such as personalized medicine point of care diagnostics arthroscopy improved drug delivery pre and probiotic treatments monitoring of the normal flora and its beneficial effects are also discussed *Microbiology of Food Quality* Elias Hakalehto, 2021-12-06

With consumer awareness increasing the importance of the environmental impact of everyday products such as food becomes a major factor for the customer This awareness was increased with the COVID 19 pandemic This book introduces green and sustainable food technology and its use during a pandemic In addition it covers current topics such as future food processing methods of maintaining industrial hygiene and microbiological quality and safety **Implementing**

Sustainability in the Curriculum of Universities Walter Leal Filho, 2017-11-17 This book presents sustainable development themes across universities and introduces methodological approaches and projects to the teaching staff It has been prepared against this background to identify ways to better teach about sustainability issues in a university context It contains a set of papers presented at a Symposium with the same title held at Manchester Metropolitan University UK in March 2017 The event was attended by a number of institutions of higher education active in this field It involved researchers in the field of sustainable development in the widest sense from business and economics to arts and fashion administration environment languages and media studies Sustainability is seldom systematically embedded in the curriculum at higher education institutions Yet proper provisions for curricular integration of sustainability issues as part of teaching programmes across universities are an important element towards curriculum greening The aims of this book are i to provide teaching staff at universities active and or interested in teaching sustainable development themes with an opportunity to document and disseminate their works i e curriculum innovation empirical work activities case studies practical projects ii to promote information ideas and experiences acquired in the execution of teaching courses especially successful initiatives and

good practice iii to introduce methodological approaches and projects which aim to offer a better understanding of how matters related to sustainable development can be tackled in university teaching Last but not least a further aim of this book prepared by the Inter University Sustainable Development Research Programme IUSDRP and the World Sustainable Development Research and Transfer Centre WSD RTC is to catalyse a debate on the need to promote sustainable development teaching today
