Huyugüzel Kışla, 2021-03-07 This book evaluates the global labour market in the context of gender equality and the associated policies and regulations particularly in developing markets to recommend measures for encouraging gender equality It exposes the

barriers that women employees encounter as well as some of the societal and workplace policies they specifically are subject to. Important themes within this topic include participation rates, the looming gap in hourly pay, availability of part time and full time positions, value and social status associated with jobs held by men and women. The book examines how global gender policy objectives such as gender equality in careers, gender balance in decision making and gender dimensions in research can be incorporated into policy frameworks. The book analyzes the gendered nature of assumptions, processes and theories. The juxtaposition between family and work, tradition and modernity and dependency and autonomy clearly still seems to be misunderstood. Therefore the book asks whether work improves women's positions in society and/or changes their roles in their families. The authors explore and uncover the connections among employment, entrepreneurship, migration, economies and gender, global labour markets and provide helpful solutions to the perceptions surrounding women's status, risks and inequality that limit their economic participation. This insightful read provides comprehensive details on a variety of themes and encourages further research on policies that are key to promoting gender equality. The book will appeal to postgraduate students and researchers of labour and feminist economics, the economics of gender, women's studies and sociology.

*Managerial Economics* William F. Samuelson, Stephen G. Marks, Jay L. Zagorsky, 2021-01-13. *Managerial Economics* 9th Edition introduces undergraduates, MBAs and executives to the complex decision problems today's managers face, providing the knowledge and analytical skills required to make informed decisions and prosper in the modern business environment. Going beyond the traditional academic approach to teaching economic analysis, this comprehensive textbook describes how practicing managers use various economic methods in the real world. Each in-depth chapter opens with a central managerial problem, challenging readers to consider and evaluate possible choices and concludes by reviewing and analyzing the decision through the lens of the concepts introduced in the chapter. Extensively updated throughout, the text makes use of numerous extended decision-making examples to discuss the foundational principles of managerial economics, illustrate key concepts and strengthen students' critical thinking skills. A range of problems building upon material covered in previous chapters are applied to increasingly challenging applications as students advance through the text. Favoring practical skills development over complicated theoretical discussion, the book includes numerous mini-problems that reinforce students' quantitative understanding without overwhelming them with an excessive amount of mathematics. **Development of**

**MSMEs in Developing Countries: Stories from Asia, Africa and Latin America** Tulus T.H. It is a best book for researchers and persons who belong to Economics and Business Study.

*Disgorgement of Profits* Ewoud Hondius, André Janssen, 2015-08-12. *Disgorgement of profits* is not exactly a household word in private law. Particularly in civil law jurisdictions as opposed to those of the common law, the notion is not well known. What does it stand for? It is best illustrated by examples. One of the best known being the British case of *Blake v Attorney*

General 2001 1 AC 268 In which a double spy had been imprisoned by the UK government before escaping and settling in the former Soviet Union While there wrote a book on his experiences upon which the UK government claimed the proceeds of the book The House of Lords as it then was allowed the claim on the basis of Blake s breach of his employment contract Other examples are the infringement of intellectual property rights where the damages of the owner are limited but the profits of the wrongdoer immense In such cases the question arises whether the infringing party should be disgorged of his profits This volume aims at establishing the notion of disgorgement of profits as a keyword in the discourse of private law It does not purport to answer the question whether or not such damages should or should not be awarded It does however aim to contribute to the discussion the arguments in favour and against and the organisation of the various actions

**Economics of Strategy 4th Edition with Microeconomics 2nd Edition Set** David Besanko,2008-01-01 [The British National Bibliography](#) Arthur James Wells,2009

**Digital Broadcasting** Martin Cave,Kiyoshi Nakamura,2006-01-01 the authors succeed in presenting an excellent overview of the evolution of most of the general issues and challenges currently facing policymakers and regulators in virtually every area of the media industries This volume will definitely be on my own required reading list the next time I teach a course in media policy and strategy Richard Hawkins Communications and Strategies This volume offers broad

coverage of the economic and commercial issues involved in digital television in major regions and countries around the world. Regulators, executives and consultants in the broadcasting and communications sectors will find much of interest in the volume. It can also be useful additional reading for students in media or business studies. The bibliographies appearing at the end of each chapter will stimulate academic debate. Madely du Preez Online Information Review. Digital television is transforming both broadcasting and, as a result of convergence, the larger world of communications. The impending analogue switch off will have a major impact on households all over the developed world. Digital Broadcasting considers the effects of digital television on the availability, price and nature of broadcast services in the Americas, Europe and Japan. It shows how this depends upon what platforms (cable, satellite, fixed or wireless broadband) countries have available for use and also upon government policies and regulatory interventions. The authors show how policies towards digital television are also closely linked with spectrum, for example whether to use spectrum released from analogue broadcasting for mobile communications or for broadcasting, including the newly developed mobile broadcasting. This is one of the key technological changes of the early 21st century and its development will affect many countries' economies and societies. The book has an invaluable broad coverage of the economic and commercial issues involved in digital television in major regions and countries around the world. Regulators, executives and consultants in the broadcasting and communications sector will find much to engage them within the book. Researchers and academics of industrial and public sector economics will also find the book of great interest. Students in media studies or business courses can also use the book as additional reading. **Management 405**, 2010

**Economics of Strategy** David Besanko, 2007. The Economics of Strategy delves into the concepts involved in sound business strategy. The text begins by focusing on the boundaries of the firm and examines the competitive strategy from the perspective of industrial organization economics. It then explores strategic positioning and dynamics.
