Accelerating K8 Math Instruction Nicki Newton, 2023 Schools have been using various approaches to address the struggles that students are having with mathematics learning that have been compounded by the pandemic There is an overwhelming consensus by both educators and researchers that we need to adapt acceleration rather than remediation as a tool to counteract the challenges that students currently face Acceleration is about equity which allows all our students to access an engaging standards based academically rigorous grade level curriculum In this book educational consultant Dr Nicki Newton shows K 8 teachers how to accelerate mathematics instruction so that all students learn and work on grade level receive the right scaffolding when they need it and feel a sense of achievement and success Educators will in turn experience lower frustration and the joy of helping students thrive Taking a deep dive into in school acceleration chapters address research planning assessment pedagogy teaching math vocabulary lesson planning goal setting and motivation and action planning Readers will learn how to use acceleration to get everybody motivated to learn and to create pathways of achievement Book Features Unpacks accelerating instruction as a way of saying everybody is invited to this party Looks at how acceleration provides a pathway to helping academically challenged students achieve and move in step with their grade level standards Offers detailed ways to plan implement and evaluate accelerated math lessons in grades K 8 Provides numerous tools templates and strategies so readers can use ideas right away *Inspiring Primary Learners* Roger McDonald, Poppy Gibson, 2021-02-25 *Inspiring Primary Learners* offers trainee and qualified teachers high quality case studies of outstanding practice in contemporary classrooms across the country Expert authors unravel and reveal the theory and evidence that underpins lessons helping you make connections with your own practice and understand what excellent looks like within each context and how it is achieved Illustrated throughout with interviews photos and examples of children s work it covers a range of primary subjects and key topics including creating displays outdoor learning and developing a reading for pleasure culture The voice of the practitioner is evident throughout as teachers share their own experience difficulties and solutions to ensure that children are inspired by their learning Written in two parts the first exemplifies examples of practice for each National Curriculum subject whilst the second focuses on the wider curriculum and explores issues pertinent to the primary classroom highlighting important discussions on topics such as Reading for pleasure Writing for pleasure Creating a dynamic and responsive curriculum Creating inspiring displays Outdoor learning Pedagogy for imagination Relationships and Sex Education This key text shows how even within the contested space of education practitioners can inspire their primary learners through teaching with passion and purpose for the empowerment of the children in their class For all new teachers it provides advice and ideas for effective and engaging learning experiences across the curriculum [Supporting Early Mathematical Development](#) Caroline McGrath, 2025-10-14 [Supporting Early Mathematical Development](#) is an essential text combining theory and practice to enable successful mathematical education

for children from birth to 12 years This text considers how students academics parents and professionals can develop their mathematical thinking practice whilst acknowledging there will always be a road yet to travel we will always be practising the craft of teaching mathematics Charting the delivery of mathematical development in playgroups children s centres nurseries and primary schools the book promotes an effective pedagogy for mathematics This new edition provides a conceptualisation of mathematics and places a fresh emphasis on mathematical literacy to empower children New chapters include the following Mediators of Mathematical Thinking Understanding Pattern Pre Algebraic and Algebraic Thinking Naming Renaming and Processing Numbers Statistics Statistical Diagrams and Probability Measure Geometry Throughout the book Caroline McGrath navigates the complexity of teaching and learning mathematics through careful thought and consideration of mediators of mathematical thinking This supportive book is designed for educators who want to know how to reconstruct mathematical ideas with children and respond in the moment Returning to the root of understanding using the adaptive pedagogical style recommended in this text you can create satisfying mathematical experiences for children

Handbook of Research on Active Learning and the Flipped Classroom Model in the Digital Age Keengwe, Jared,2015-11-12 The notion of a flipped classroom draws on such concepts as active learning student engagement hybrid course design and course podcasting The value of a flipped class is in the repurposing of class time into a workshop where students can inquire about lecture content test their skills in applying knowledge and interact with one another in hands on activities The Handbook of Research on Active Learning and the Flipped Classroom Model in the Digital Age highlights current research on the latest trends in education with an emphasis on the technologies being used to meet learning objectives Focusing on teaching strategies learner engagement student interaction and digital tools for learning this handbook of research is an essential resource for current and future educators instructional designers IT specialists school administrators and researchers in the field of education *Rethinking the Teaching Mathematics for Emergent Bilinguals* Ji Yeong I,Hyewon Chang,Ji-Won Son,2019-11-09 This book focuses on the role of cultural background in Korean public schools and provides essential insights into how Korean teachers perceive and respond to the transition of their classroom situations with Korean language learners It reveals the perspectives and the practices of Korean teachers especially with regard to multicultural students who struggle with language barriers when learning mathematics The information provided is both relevant and topical as teaching mathematics to linguistically and culturally diverse learners is increasingly becoming a worldwide challenge [Interactive Whiteboards for Education: Theory, Research and Practice](#) Thomas, Michael,Schmid, Euline Cutrim,2010-02-28 This book contributed to the debate about the importance of research based studies in the field of educational policy making in general and learning technologies particularly the use of interactive whiteboards for education Provided by publisher *A Guide to Teaching Elementary Science* Yvette F. Greenspan,2015-12-21 Nationally and internationally educators now understand the critical importance of STEM subjects science technology engineering and

mathematics Today the job of the classroom science teacher demands finding effective ways to meet current curricula standards and prepare students for a future in which a working knowledge of science and technology will dominate But standards and goals don't mean a thing unless we grab students attention capture and deepen children's natural curiosity create an exciting learning environment that engages the learner and make science come alive inside and outside the classroom setting A Guide to Teaching Elementary Science Ten Easy Steps gives teachers at all stages of classroom experience exactly what the title implies Written by lifelong educator Yvette Greenspan this book is designed for busy classroom teachers who face tough conditions from overcrowded classrooms to shrinking budgets and too often end up anxious and overwhelmed by the challenges ahead and their desire for an excellent science program This book helps teachers develop curricula compatible with the Next Generation Science Standards and the Common Core Standards provides easy to implement steps for setting up a science classroom plus strategies for using all available resources to assemble needed teaching materials offers detailed sample lesson plans in each STEM subject adaptable to age and ability and designed to embrace the needs of all learners and presents bonus information about organizing field trips and managing science fairs Without question effective science curricula can help students develop critical thinking skills and a lifelong passion for science Yvette Greenspan received her doctorate degree in science education and has developed science curriculum at all levels A career spent in teaching elementary students in an urban community she now instructs college students sharing her love for the teaching and learning of science She considers it essential to encourage today's students to be active learners and to concentrate on STEM topics that will help prepare them for the real world

Creativity of an Aha! Moment and Mathematics Education ,2021-05-25 Creativity of an Aha Moment and Mathematics Education introduces bisociation the theory of Aha moment creativity into mathematics education It establishes relationships between Koestler's bisociation theory and constructivist learning theories It lays down the basis for a new theory integrating creativity with learning to describe moments of insight at different levels of student development The collection illuminates the creativity of the eureka experience in mathematics through different lenses of affect cognition and conation theory of attention and constructivist theories of learning neuroscience and computer creativity Since Aha is a common human experience the book proposes bisociation as the basis of creativity for all It discusses how to facilitate and assess Aha creativity in mathematics classrooms Contributors are William Baker Stephen Campbell Bronislaw Czarnocha Olen Dias Gerald Goldin Peter Liljedahl John Mason Benjamin Rott Edme Soho Hector Soto Hannes Stoppel David Tall Ron Tzur and Laurel Wolf

Journal for Research in Mathematics Education ,2015 [Science Reporter](#) ,2002 **Policy, Practice, and Readiness to Teach Primary and Secondary Mathematics in 17 Countries** Maria Teresa Tatto,John Schwille,Sharon Louise Senk,2012 TEDS M represents the first large scale international comparative study of the preparation of primary and lower secondary specifically mathematics teachers IEA considers TEDS M a landmark study in

terms of its examination within both national and international contexts of country level policies relating to the preparation of future teachers of mathematics The authors of this report look closely at how these policies are played out in the participating countries varied teacher education programs and instructional practices and speculate on the implications of these programs and practices for student learning in schools They also suggest how TEDS M might contribute to ongoing research into teacher education
