Modern Geotechnical Design Codes of Practice Patrick Arnold, Gordon A. Fenton, Michael A. Hicks, Timo Schneckendiek, Brian Simpson, 2013 The ground is one of the most highly variable of engineering materials. It is therefore not surprising that geotechnical designs depend on local site conditions and local engineering experience. Engineering practices relating to investigation and design methods, site understanding and to safety levels acceptable to society will therefore vary between different regions. The challenge in geotechnical engineering is to make use of worldwide geotechnical experience established over many years to aid in the development and harmonization of geotechnical design codes. Given the significant uncertainties involved, empiricism and engineering judgment will undoubtedly always be an essential element of geotechnical design. However, rigorous and scientific approaches based on probability theory are finding increased attention in the calibration of modern geotechnical codes of practice and these codes can and should be used to aid fundamental engineering judgment. Containing contributions on Code Implementation, Code Application and Code Development, this book provides a single resource that code developers, practitioners and researchers can use to understand the different choices made by national code developers around the world. Furthermore, the book highlights some of the key challenges faced worldwide concerning the ongoing process of harmonizing geotechnical design code specifications.

The Business of Sports Mark Conrad, 2017-02-17 The Business of Sports provides a comprehensive foundation of the economic, organizational, legal and political components of the sports industry. Geared for journalism, communication and business students but also an excellent resource for those working in sports, this text introduces readers to the ever-increasing complexity of an industry that is in constant flux. Now in its third edition, the volume continues to offer a wealth of statistics and case studies up to date with the newest developments in sports business and focused on cutting-edge issues and topics including the many changes in international sports and the role of analytics in decision making and tax rules that have a major effect on athletes and teams.

Engage and Empower Mary Amanda Stewart, Christina Salazar, Victor Antonio Lozada, Christina Thomas, 2021-12-15 This edited book provides ready-to-use engaging curriculum units for an integrated approach to teaching English language arts and U.S. history in grades 4-12. The purpose is to promote social justice and activism while building critical literacies students need in the 21st Century. Through implementing the curriculum units in this book, teachers and students can challenge inequities and promote activism. A central goal of this project is to represent and empower marginalized students. The traditional curriculum presents one view, one story as the only story and one people as the norm. This book intentionally centers the experiences of Black, Indigenous, People of Color (BIPOC) and other marginalized communities. In addition to expanding the curriculum to include all people, educating students about issues of injustice in the U.S. will enable them to enact change. Additionally, this book serves to educate all students by exposure to central issues in past and present society. By creating space for a multicultural perspective, this curriculum may reduce the friction that occurs when encountering

those whose lived experiences and perspectives do not align with one's own. By educating students about the privileges they have not examined, teachers can foster empathy and empower allies.
