Dereck Woodward, aeromodeller, designer and magazine writer for the past fifty years. Building and Flying Model Aircraft Paul Edward Garber, 1928. A Beginner's Guide to Building and Flying Model Airplanes Robert Lopshire, 1967. Instructions for building model airplanes covering the parts of a model, different tools and materials and flying techniques. Antique and Classic Model Planes Dr. Heinrich Eder. Antique and classic models are not antiques but replicas that are intended to remind us of the early golden days of model aviation. The antique modelling scene has gained a lot of popularity over the last few years. Many model aviation enthusiasts no longer want to follow the path of ever larger models with their high tech equipment. The rounded forms of the antique and classic models stand out from the modern, technologically determined standard forms and amaze younger people. The smell of fuel and varnish inspires some older model pilots and brings back forgotten memories of their youth. In addition to an introduction to antique and classic aeromodelling and a broad theoretical and practical knowledge, the book contains an extensive and impressive as well as illustrated collection of over 100 antique model portraits which were taken at antique model meetings in Germany and nearby foreign countries. The author Dr. Heinrich Eder has been active in the model aviation scene for almost seventy years. In the book, he gives an overview of building materials, stringing methods and the design of the antiques spanning from the past to the present. In addition, Eder addresses topics such as aerodynamics and the profile problems of vintage models as well as the typical drives from the compressed air engine to the carburettor, diesel and gives important tips on installation. From the content: Introduction to Antique and Classic Model Flying, Drives of antique models, Construction techniques and plans, Aerodynamics of antique models, Flight stability of antique models, Flight practice. Over 100 illustrated model portraits, Improvement and upgrade of various printer models. Educational Screen and Audiovisual Guide, 1928. Challenges for Educational Research Professor Jean Rudduck, Professor Donald McIntyre, 1998-12-17. There is much in the book that is thought provoking and much wise counsel is offered. I found this book immensely interesting. I can recommend it to anyone with an interest in educational research. *British Journal of Educational Psychology*. This book, edited by Jean Rudduck and Donald McIntyre, provides an insightful analysis of the key issues involved in attempting to take stock of what should be the main purposes of educational research and how well the research that has been conducted has met these purposes. Overall, I found this book immensely interesting. It is published by Paul Chapman as one of the BERA Dialogues Series. This series is intended to provide a forum for a scholarly analysis of a theme that will be of interest to the international research community. This book fulfils this aim admirably and I can recommend it to anyone with an interest in educational research.
