NHERI 2015-2025: A Decade of Discovery in Natural Hazards Engineering Cheryl Ann Blain,Julio Alfonso Ramirez,David Richard Johnson,Navid Jafari,Qin Chen,Jack Cadigan ,Rebecca Napolitano,2025-11-18 Natural hazards such as earthquakes landslides windstorms wildfires tsunamis and storm surge are all occurring with increased frequency and intensity These events often cause significant disruptions to our built environment consisting of buildings roads bridges parks streets and systems that provide transportation water power and more bringing to the forefront our need for solutions In the last three years the U S experienced an average of 20 billion dollar disasters per year up from 12.8 billion dollar disasters per year in the 2010s and 6.7 billion dollar disasters per year in the 2000s NOAA Research in natural hazards engineering aims to develop tools and methods that will mitigate such damage in the future Funded by the National Science Foundation the Natural Hazards Engineering Research Infrastructure NHERI is a national network of university centered experimental facilities NHERI facilities are dedicated to reducing damage and loss of life due to natural hazards such as earthquakes landslides windstorms wildfires tsunamis and storm surge The NHERI network provides researchers in the natural hazards engineering and social science communities with state of the art tools data and training needed to meet the research challenges of the 21st century NHERI s 14 member network see graphic below includes eight experimental facilities a social science component a center for computational modeling and simulation a RAPID reconnaissance facility a network coordination office and a cyberinfrastructure Two more experimental facilities are in the planning phase To raise awareness and to encourage shared use of NHERI experimental facilities the Network Coordination Office led an effort for all NHERI components to publish informational articles in the journal *Frontiers in Built Environment* and to create an E book with the collection of all 15 articles In the spring of 2020 NHERI established its own research topic in FBE Natural Hazards Engineering Research Infrastructure NHERI 2016-2020 Mitigating the Impact of Natural Hazards on Civil Infrastructure and Communities The NHERI topic consists of 15 articles written by more than 100 authors A second series of publications in 2023 focused on the transfer of technology from research undertaken at NHERI affiliated institutions Technology transfer took the form of regulatory changes updates to post disaster reconnaissance procedures to account for multiple hazardous events approaches

to community engagement that led to earlier adoption of technology and tools that enabled end users to prioritize hazard mitigation efforts to name a few Now after almost a decade of operations we examine how the NHERI network has changed the way people practice and conduct research in natural hazards engineering From state of the art unique experimental facilities that tackle hazards from wind waves storm surge and earthquakes to a real time resource for field reconnaissance equipment to a cyberinfrastructure that publishes and archives natural hazards data for reuse to the coordination office that has developed an education pipeline for future natural hazards researchers to a social sciences hub that has reshaped how post event reconnaissance is undertaken and to modeling and simulation tools that deliver risk analyses the NHERI network researchers have advanced engineering research and practice To this end we are soliciting original research papers 12 000 words with no more than 15 figures tables that highlight how the NHERI network has changed the way people practice and conduct research in natural hazards engineering This capstone collection will emphasize the NHERI network s impact specific ways that NHERI researchers have advanced engineering research and practice
