Mastering Fashion Styling:

Mastering Fashion styling Jo Dingemans, 1999-11-11 Fashion is a very popular subject among young people. Any course with fashion as a prefix attracts lots of students. Despite this, many prospective students and people have little idea what jobs in the fashion industry entail. Fashion Styling is one of the least well researched areas in fashion colleges. The emphasis is put on the end result, i.e. visual imagery, rather than the process of creating it. This how-to book provides an insight into the processes you have to follow to work in this area, be it editorial, commercial, or show styling. It includes an eight-week introductory programme to the subject and projects whereby students can simulate professional practice and learn the techniques and skills necessary for a career in styling. At the end of the book, there is a source directory, a glossary of terms, and a bibliography which provide reference points for further research and study.
