

Use the question-specific markscheme together with the markbands. Award up to the maximum marks as indicated.

1. (a) Explain two determinants of price elasticity of demand.

[10]

Answers *may* include:

- Terminology: price elasticity of demand, demand.
- Explanation: that price elasticity of demand depends upon a number of determinants and two of them should be explained, such as the number and closeness of substitutes, degree of necessity, proportion of income spent on the good, time and others.
- Diagram: to show price elasticity of demand, for example changing along a straight-line demand curve or diagrams of relatively more or less elastic demand curves.

A maximum of [6] should be awarded if only **one** of the two determinants is addressed.
