## **Manual Stress Scale:**

**Assessment Scales in Depression and Anxiety - CORPORATE** Raymond W. Lam, Erin E. Michalaak, Richard P. Swinson, 2006-08-08 There are a number of books recently published on assessment scales for depression and anxiety. However, these books are generally more detailed than clinicians require, are specific to one or other condition, or involve specialty populations such as children or geriatrics. To meet the needs of clinicians treating patients with depressive and anxiety disorders, this volume aims to bring together empirically validated assessment scales. In a concise and user-friendly format, *Assessment Scales in Depression and Anxiety* illustrates the assessment scales used in clinical trials and research studies, shows how to select an assessment scale and to decide which scale to use for a particular clinical situation, and provides sample assessment scales for clinicians to use in their practice.

Harriet P. Lefley, PhD, University of Miami School of Medicine. The chapters examine the use and efficiency of various measurement tools that intend to evaluate diagnostic and functional specificity, life stressors, supportive resources, quality of life, and more. Key Features: Presents the purpose of each measurement tool; the description; psychometric properties; reliability; validity; and usage guidelines in template format. Includes measurement tools for functional assessment, community living, social problem solving, and coping; agency performance evaluation; and more.
