

The following instructions will help guide you through the initial steps of setting up your dryer for use. Please note that every section of this manual provides important information regarding the preparation and use of your dryer, and it is important that you review this entire manual before proceeding with any installation or use. More detailed instructions concerning electrical connections, gas connections, and exhaust requirements are provided at other parts of this manual.

STEP 1 Positioning the Dryer.

Choose a location with a solid floor for your dryer. Place the dryer at least eighteen inches above the floor for a garage installation. After placing the dryer in the desired location, please make sure that it has the required clearances shown below, and sections on Exhaust and Maintenance requirements.

* Most installations require a minimum 5 1/2 in. (14 cm) clearance behind the dryer for the exhaust vent with elbow.

Note

Level the dryer using the leveling legs and tighten the adjusting nuts to hold them in place.

All four legs should be placed firmly on a solid and even floor.

If the dryer is not level, the clothes will not tumble properly and the sensor will not be able to detect the dryness level accurately.

Adjust the leveling legs carefully to avoid injury.

Note

No other fuel-burning appliance shall be installed in the same closet as the dryer. This applies only to dryers suitable for installation in a closet.

▲ WARNING

The appliances are heavy. Two or more people are required when moving or installing the appliance. There is a risk of serious back injury or other injuries.

Certain minimum clearances are required above, behind, and to the sides of the unit, as shown below. Those required minimum clearances are set forth in the picture below. Please also keep the following instructions in mind when installing in a closet or recessed area:

- Consider allowing additional clearance for installation and servicing.
- Wall, door and floor molding may force additional clearances.
- An additional inch of clearance is recommended to minimize noise transfer.
- Consider space needed for companion appliances.
- For closet installations, the picture below shows the minimum required ventilation openings for the door. A louvered door with comparable ventilation openings is also acceptable.
