**Novel Technologies in the Diagnosis and Management of Sleep-disordered Breathing** Henri Korkalainen, Ding Zou, 2024-03-13 Sleep disordered breathing ranging from habitual snoring to severe obstructive sleep apnea is highly prevalent and represents a growing global healthcare burden Besides disrupting sleep sleep disordered breathing leads to detrimental outcomes such as excessive daytime sleepiness neurocognitive impairment and increased cardiometabolic morbidities The gold standard diagnostic procedures e.g. in lab polysomnography are cumbersome and standard parameters derived from sleep studies often yield poor long term prognostic value Hence there is a need for innovative diagnostic technologies and novel sleep metrics to enable simple diagnosis and tailored disease management **Large-Scale**

**Grid-Connected Wind and Photovoltaic Farms** Wei Yao, Yongxin Xiong, Hongyu Zhou, Jinyu Wen, 2025-05-29 This book provides a comprehensive study of the modeling analysis and control of wind farms and solar power stations It starts with dynamic vector modeling methods for wind farms and solar power stations which enhance modeling efficiency and model accuracy Building upon this modeling framework it also covers stability analysis and control methods for wind farms and solar power stations from both steady state and transient perspectives Lastly considering the integration of energy storage

into renewable energy power stations the book explores the analysis and control of wind energy storage and solar energy storage hybrid systems It adopts a holistic approach establishing a fundamental framework for the topic progressing from modeling to analysis and then to control facilitating readers comprehension The book is targeted towards undergraduate and graduate students interested in renewable energy power stations researchers focusing on station level modeling analysis and control of renewable energy as well as engineers in the field      *Intergenerational Wellbeing and Public Policy* Girol

Karacaoglu,Jacek B. Krawczyk,Anita King,2019-01-28 The distinctive contribution of this book is the formulation of an integrated social environmental and economic framework for public policy This contribution is realised through investigations and conclusions in the following four domains a formal stylised model that provides a platform for an integrated approach to public policy a policy informing simulation model that can be used to operationalise the public policy insights proposed in the stylised model the implications of introducing fundamental or radical uncertainty and complexity into the policy framework and the use of viability theory to demonstrate how one can think of and implement public policy in an uncertain and complex world when the focus of policy needs to shift to building resilience to systemic risks The book s stylised model is constructed by weaving together threads from the wellbeing human needs complex systems sustainable development endogenous economic growth directed technical change and credit based money literatures Throughout the perspective is that of a policy adviser to a wellbeing state as distinct from a welfare state The key linkages or relationships in the model are supported by empirical evidence that draws on the wider literature in related fields      *Futuristic Trends in*

*Numerical Relaying for Transmission Line Protections* Ujjaval Patel,Praghmesh Bhatt,Nilesh Chothani,2020-10-17 This book presents the state of the art approach for transmission line protection schemes for smart power grid It provides a comprehensive solution for real time development of numerical relaying schemes for future power grids which can minimize cascade tripping and widespread blackout problems prevailing all around the world The book also includes the traditional approach for transmission line protection along with issues and challenges in protection philosophy It highlights the issues for sheltering power grid from unwanted hazards with very fundamental approach The book follows a step by step approach for resolving critical issues like high impedance faults power swing detection and auto reclosing schemes with adaptive protection process The book also covers the topic of hardware solution for real time implementation of auto reclosing scheme for transmission line protection schemes along with comparative analysis with the recently developed analytical approach such as Artificial Neural Network ANN Support Vector Machine SVM and other machine learning algorithms It will be useful to researchers and industry professionals and students in the fields of power system protection      *Marker-Assisted Plant Breeding: Principles and Practices* B.D. Singh,A.K. Singh,2015-06-26 Marker assisted plant breeding involves the application of molecular marker techniques and statistical and bioinformatics tools to achieve plant breeding objectives in a cost effective and time efficient manner This book is intended for beginners in the field who have little or no prior exposure to

molecular markers and their applications but who do have a basic knowledge of genetics and plant breeding and some exposure to molecular biology An attempt has been made to provide sufficient basic information in an easy to follow format and also to discuss current issues and developments so as to offer comprehensive coverage of the subject matter The book will also be useful for breeders and research workers as it offers a broad range of up to the year information including aspects like the development of different molecular markers and their various applications In the first chapter the field of marker assisted plant breeding is introduced and placed in the proper perspective in relation to plant breeding The next three chapters describe the various molecular marker systems while mapping populations and mapping procedures including high throughput genotyping are discussed in the subsequent five chapters Four chapters are devoted to various applications of markers e g marker assisted selection genomic selection diversity analysis finger printing and positional cloning In closing the last two chapters provide information on relevant bioinformatics tools and the rapidly evolving field of phenomics
