Motorola's Droid 2 Mohanbir S. Sawhney,2017 After it introduced the extremely successful Droid smartphone into the market in 2009 Motorola quickly moved to develop the next generation Droid 2 before the next wave of smartphones including the rumored iPhone 4 flooded the market The development process was moving smoothly for the company when Verizon its biggest partner dropped a bombshell It wasn t happy with the mechanical camera button on the Droid 2 citing customer feedback and wanted it to be changed to a software button like the iPhone s This request immediately placed Motorola in the proverbial horns of a dilemma On the one hand it couldn t brush away the request of its biggest and most important partner On the other hand changing the camera button now would mean delaying the Droid 2 s entry into the market Should the Droid 2 team remove the camera s hardware button in favor of a software button per Verizon s request or not John Smith the product manager leads the cross functional Droid 2 team The case setting is an emergency war room meeting to address this critical issue just weeks prior to launch John s objective is to obtain the salient

facts and opinions of team members quickly so he can make an informed recommendation to his boss by the end of the day. He is concerned that this last minute request for a design change will not only threaten to delay the launch which would have significant financial implications but could potentially create deep fissures in a hitherto effective team that had been running like a well oiled machine. The case puts students in a situation that simulates a real world discussion and allows them to experience what it is like as a product manager to orchestrate a meeting with cross functional teams that have conflicting priorities and agendas. It illustrates the challenges a product manager faces while striving to make important decisions with little or no direct authority over the various teams. After reading and analyzing this case, students will be able to: Experience the dynamics of cross functional teams in product management. Practice running effective and productive meetings. Practice bringing together various personalities and points of view. Understand the importance of setting goals and clear expectations. Internalize the importance of building relationships and influencing teams even when you do not have direct authority.

Motorola's Droid 2 Mohanbir S. Sawhney, John Miniati, Patrick Kim, Pallavi Goodman, 2016. After it introduced the extremely successful Droid smartphone into the market in 2009, Motorola quickly moved to develop the next generation Droid 2 before the next wave of smartphones, including the rumored iPhone 4, flooded the market. The development process was moving smoothly for the company when Verizon, its biggest partner, dropped a bombshell. It wasn't happy with the mechanical camera button on the Droid 2 and wanted it to be changed to a software button like the iPhone's. This case explains how Motorola dealt with this awkward dilemma.
