Manual For Paints Production:

The Manufacture of Paint James Cruickshank Smith, 1901 Paints, Pigments, Varnishes and Enamels Technology Handbook (with Process & Formulations) 2nd Revised Edition NIIR Board of Consultants and Engineers, 2016-10-01

The use of paints varnishes and enamels for decoration is nearly as old as human culture itself. These are widely used in homes as well as in industry because painted surfaces are attractive and easy to keep clean. Paint is generally made up of a pigment. It is a chemical material which alters the color of reflected or transmitted light due to wavelength selective absorption. Varnish is a transparent hard protective finish or film primarily used in wood finishing but also for other materials. Varnish is traditionally a combination of a drying oil, a resin, and a thinner or solvent. The technology of paints, varnishes, and enamels is changing rapidly and becoming more complex each day. The paint industry is an important segment of the chemical industry. Enamel paint is paint that air dries to a hard, usually glossy finish, used for coating surfaces that are outdoors or otherwise subject to wear or variations in temperature. The Indian paint industry has seen a gradual shift in the preferences of people from the traditional whitewash to higher quality paints like emulsions and enamel paints with improvement in lifestyle. India is the second largest consumer of paint in Asia. Over the past few years, the Indian paint market has substantially grown and caught the attention of many major players. The market for paints in India is expected to grow at 15% to 20% GDP growth rate in the coming years. In terms of volumes, pigments demand is expected to reach 4.4 million tonnes. Due to increased Government funding for infrastructure, demand for paints both in industrial and decorative segment is set to rise, thereby rendering Indian paint industry to be poised for further growth. This handbook is designed for use by everyone engaged in the paints, pigments, varnishes, and enamels industry. It provides all the information of the various formulae and processes of paints, pigments, varnishes, and enamels. The major content of the book are: paint testing, color in paint, maintenance paints, emulsion paints, exterior or interior paints, exterior or interior multicolor paints, exterior swimming pool paints, and enamels, interior ceiling paints, metal paints, marine paints, enamel paints, interior fire retardant paints, interior gloss paints, paint formulation, manufacture of natural copal varnishes, floor paints, and enamels, varnishes, lacquers, and floor finishes, white pigments, colored pigments, pigment dispersion, etc. The book contains addresses of plant machinery suppliers with their Photographs. It will be a standard reference book for professionals, entrepreneurs, those studying and researching in this important area, and others interested in the field of paints, pigments, varnishes, and enamels technology.
