Managing School Districts for High Performance Stacey Childress, 2007 *Managing School Districts for High Performance* brings together more than twenty case studies and other readings that offer a powerful and transformative approach to advancing and sustaining the work of school improvement. At the center of this work is the concept of organizational coherence aligning organizational design, human capital management, resource allocation, and accountability and performance improvement systems to support an overarching strategy. This central idea provides a valuable conceptual framework for current and future school leaders. The case studies presented in *Managing School Districts for High Performance* grow out of the Public Education Leadership Project (PELP), a unique partnership between the Harvard Business School, the Harvard Graduate School of Education, and a network of urban school districts. This rich array of cases explores the managerial challenges districts face as they seek to ensure rich learning opportunities and high achievement for all students across a system of schools. This book of insightful case studies fills a void long felt by educational administrators in search of practical, real-world training tools. It will serve as a catalyst for the tough conversations district leaders need to have about achieving high-quality outcomes for all students. The Broad Center for the Management of School Systems has used many of these cases with great success, and we are excited that they are now compiled into a single collection. Dan Katzir, Managing Director, The Broad Foundation. This volume is not a treatise about how schools and districts should work. Rather, it provides a deep immersion in the real dilemmas involved in advancing school district reform. Anyone who works through these cases cannot help but come away with a more informed vision for change, a more reflective orientation about the interrelationships among the multiple tasks involved, and a more prudent grasp of what it takes to educate all children to high academic standards. The course of study presented by *Managing School Districts for High Performance* should be required professional education for anyone charged with advancing a coherent agenda of school improvement in our diverse, demanding, and rapidly changing society. Anthony S. Bryk, Spencer Professor of Organizational Studies, Stanford University. This set of case studies offers practitioners, policymakers, and scholars the opportunity to learn from the collective wisdom and real-life experiences of educational leaders involved in systemic transformation. Implementing coherent reform strategies designed to improve and sustain student performance often takes place in a vacuum. As a former urban superintendent, I believe that these selected educational case studies provide a compelling forum for shared experiential teaching and learning. Arlene Ackerman, Christian A. Johnson, Professor of Outstanding Educational Practice Teachers College, Columbia University. This collaboration between the Harvard Business School and the Harvard Graduate School of Education provides a set of analytical tools to address the most complex and challenging issues facing urban public schools. The contemporary case studies document actual choices and constraints and point to patterns and similarities across organizations from urban schools to corporate environments. Carol Johnson, Superintendent, Boston Public Schools. Stacy Childress is a lecturer at

Leading for Equity Stacey M. Childress, Denis P. Doyle, David A. Thomas, 2009-07-01 Leading for Equity tells the compelling story of the Montgomery County Maryland Public Schools and its transformation in less than a decade into a system committed to breaking the links between race and class and academic achievement In chapters organized around six core themes the authors lay out the essential elements of MCPS s success They identify key lessons other districts can draw from MCPS s experience and offer a framework for applying them A dramatic departure from business as usual MCPS has won nationwide attention as a compelling model for tackling the achievement and opportunity issues that confront our nation as a whole

Improving Education in the US Rafael Yanushevsky, 2011 US education is in crisis This history and analysis of the education system is an essential primer for parents teachers and school administrators as well as parent teacher organizations education majors education administration majors the media politicians and everyone who wants to see American schools do a better job The author considers the genesis of public schools in the United States various aspects of public education systems from elementary school through university trends in education and reform and issues that still need to be addressed The book contains information about public and private organizations think tanks institutions and governmental bodies involved in public education reform The book shows the deficiency of the existing education system and compares it to more efficient systems The author shows that most of the existing approaches to improve education are based on the same foolish idea that as long as government spending on education is great enough the improvement will follow The bond between education and politics hinders progress in education The problems facing schools as well as the recommended solutions are considered The author cites multiple research attempts to improve the functioning of the existing education system that have still failed to bring any tangible results He uses his specialized knowledge to explain what should be done for educational progress to become reality
