

Natural disasters

Experts know that a disaster is coming but they do not know when it will happen. They do know that it could cause a lot of damage. They think it will be worse than a hurricane. The disaster they are worried about is an earthquake.

There is a break in the earth's crust. It is called the San Andreas Fault. The San Andreas Fault is in California. Many earthquakes happen along the San Andreas Fault. In 1989 there was a big earthquake on the fault. The earthquake was called the "Loma Prieta Earthquake." Many people were hurt or died. Many buildings were ruined. Lots of people lost their homes. Roads and bridges were also damaged.

A large earthquake could happen in Southern California. Many small earthquakes have happened in the last year. Earthquake experts think that a large earthquake will happen there soon. They think a big earthquake will happen in the next few years. The San Andreas Fault has many power lines stretched across it. There are water channels close to the earthquake fault. A large earthquake in Southern California would destroy energy and water supplies. Lots of people would be without power or water for weeks. Buildings that have not been built strong enough would be destroyed. Not all hospitals would be able to help people who were injured. Many people would die or be homeless.

People need to be prepared. They need to know what to do if an earthquake happens. Everyone in California should have a survival kit at home. The emergency kit would include food and water. There should be medication and first aid supplies in the kit. A good survival kit will also have a portable radio, flashlights and spare batteries. All of the supplies in the kit should last at least 3 days.

Choose the correct answer

1. What is the expected disaster?
 - a) A quake hit.
 - b) A hurricane.
 - c) The San Andreas Fault.
 - d) Loma Prieta Earthquake.

Natural Disaster Short Story Grade 4:

Equitable Access for English Learners, Grades K-6 Mary Soto, David E. Freeman, Yvonne S. Freeman, 2019-12-20

Plain and simple until our English learners have equitable access to the curriculum they'll continue to struggle with subject area content. And if you're relying on add-ons to fit in from your language arts basal or a supplementary program, Mary Soto, David Freeman, and Yvonne Freeman are here to equip you with much more effective, efficient, and engaging strategies for helping your English learners read and write at grade level. One assurance right from the start: Mary, David, and Yvonne are not suggesting you reinvent your curriculum. Instead, *Equitable Access for English Learners, Grades K-6* focuses on how to fortify foundational practices already in place. First, you'll learn more about the Equitable Access Approach, then it's time to dive into the book's four units of study. Drawing on each unit's many strategies, you'll discover how to apply them to any unit in your own language arts curriculum and start differentiating. How to draft and implement language objectives to help English learners meet academic content standards. How to make instructional input comprehensible, including translanguaging strategies that draw on your students' first languages when you don't know how to speak them. How to utilize the characteristics of text to support readers, along with a rubric for determining a text's cultural relevance. How to build students' academic content knowledge and develop academic language proficiency. Each unit addresses a commonly taught topic in today's language arts programs and comes with ready-to-go review and preview activities, key strategies, grade-level adaptations, reflection exercises, and printable online resources. Taken as a whole, they constitute an all-new approach for providing that equitable and excellent access our English learners so rightfully deserve. When you adopt our Equitable Access Approach, your students will not only thrive; they'll also find your language arts curriculum much more meaningful and engaging. Mary Soto, David E. Freeman, and Yvonne S. Freeman

[Natural Disasters in Latin America and the Caribbean](#) June

Carolyn Erlick, 2021-02-03 *Natural Disasters in Latin America and the Caribbean: Coping with Calamity* explores the relationship between natural disasters and civil society, immigration and diaspora communities, and the long-term impact on emotional health. Natural disasters shape history and society, and in turn, their long-range impact is determined by history and society. This is especially true in Latin America and the Caribbean, where climate change is increasing the frequency and intensity of these extreme events. Ranging from pre-Columbian flooding in the Andes to the devastation of Hurricane Maria in Puerto Rico, this book focuses on long-range recovery and recuperation rather than short-term disaster relief. Written in the time of the coronavirus pandemic, the author shows how lessons learned about civil society, governance, climate change, inequality, and trauma from natural disasters have their echoes in the challenges of today's uncertain world. This book is well-suited to the classroom and will be an asset to students of Latin American history, environmental history, and historical memory.
